

Carbon Reduction Plan Template

Supplier name: SSE Energy Supply Limited

Publication date: July 2026

Commitment to achieving Net Zero

SSE Energy Supply Limited is committed to achieving net zero across all scopes of carbon emissions by 2050 at the latest. As a limited company under the SSE plc umbrella, SSE Energy Supply Limited aligns with SSE plc's vision of being a leading energy company in a net zero world. To achieve this, our strategy is to create value for shareholders and society in a sustainable way by developing, building, operating, and investing in the electricity infrastructure and businesses needed in the transition to net zero.

SSE plc aims to achieve net zero greenhouse gas emissions across scopes 1 and 2 by 2040 (subject to security of supply requirements) and for the remaining scope 3 emissions by 2050. SSE plc's long-term net zero ambitions are supported by a series of interim targets approved by the Science Based Targets Initiative (SBTi). These targets are aligned to the 2015 Paris Agreement and a 1.5°C pathway, and meet the strict SBTi criteria which requires that they cover scope 1, 2 and 3 GHG emissions. SSE plc's Net Zero Transition Plan¹ outlines SSE's net zero aligned targets and describes 18 actions to reduce material GHG emissions across scopes 1, 2 and 3.

SSE plc publishes a Sustainability Report² on an annual basis, which provides an overview of the performance and progress against the business strategy. SSE Energy Supply Limited is included within the scope of this report.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024/25
Additional Details relating to the Baseline Emissions calculations.
Annually SSE plc GHG data is subject to external independent limited assurance by Ernst & Young Global Limited ('EY') which partially includes SSE Energy Supply Limited data. There are some exclusions as stated in the GHG reporting criteria for example where emissions sources fall below the materiality threshold. ³ To date, SSE Energy Supply Limited carbon footprint reporting has been undertaken as part of SSE plc. As more reliable methods for data calculation are implemented, SSE Energy Supply Limited will continue to improve the scope and data quality of its emissions reporting. The carbon footprint has been calculated on an operational control basis.

Baseline year emissions: 2024/25	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1 ⁴	3
Scope 2 ⁵	22
Scope 3 ⁶ (Included Sources)	327
Total Emissions⁷	352

Current Emissions Reporting

Reporting Year: 2024/25	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	3
Scope 2	22
Scope 3 (Included Sources)	327
Total Emissions	352

Emissions reduction targets

To continue our progress to achieving net zero, as part of SSE plc, SSE Energy Supply Limited is aligned with the following carbon reduction targets:

- **Scope 1:** Reduce the carbon intensity of scope 1 GHG emissions by 80% by 2030, from a 2018 baseline.
- **Scope 1 & 2:** Reduce absolute scope 1 and 2 carbon emissions by 72.5% by 2030 from a 2018 base year.
- **Scope 3:** Reduce absolute GHG emissions from the use of products sold by 50% by 2034 from a 2018 base year.

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been implemented:

- The ISO 14001 certificate covering SSE Energy Supply Limited.
- Encouraging low carbon practices within our supply chain through the application of the SSE Sustainable Procurement Code.
- The creation of a Sustainability team with dedicated Climate and Carbon resource within the business to drive continuous improvement.
- Reducing unnecessary business travel where possible.

In the future, we plan to continually improve our environmental performance through the implementation of the following measures:

- Expand and improve our carbon emissions data collection processes to enable broader understanding of our carbon footprint.
- Continue to support our suppliers to develop their net zero plans, allowing them access to learning material through our Sustainability Supply Chain School partnership.
- Establish KPIs to drive continuous emissions reductions across the business.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 006 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁸ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁹.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.¹⁰

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
