

#MedSafetyWeek

2-8 November 2026

Experiencing a problem with a medicine or medical device?

We all have the power to make healthcare products safer. Help others by reporting a problem using the Yellow Card scheme.

You can report suspected side effects to medicines, adverse incidents with medical devices, safety concerns about e-cigarettes/vapes and defective, low-quality or falsified (fake) products to improve patient safety.

Every report counts
