

SHARP HEALTHCARE NURSING LEADERSHIP

Name: Susan Stone, PhD, RN, FACHE, NEA-BC

Title: Senior Vice President
Health System Operations and System Chief Nursing Executive

Summary

In alignment with Sharp HealthCare's (SHC's) mission, vision and values, I am accountable for the business strategy, continued growth and operating results of identified health system functions including Global and Out-of-Network Patient Management and Placement Services, Integrated Care Management Services, and Laboratory Services. I am responsible for assuring the highest quality of patient care and professional services while optimizing the utilization of SHC's resources.

As the SHC System Chief Nursing Executive (SCNE), I am directly responsible for establishing and advancing nursing practice, programs, policies, protocols, and procedures across the health system. As the SCNE, I work in collaboration with the market chief executive officers and entity chief nursing officers to ensure that local, state, and federal regulations are being met. I represent SHC across various government institutions/entities and professional organizations.

My dissertation focused on a retrospective evaluation of the Planetree Patient-Centered model of care program's impact on inpatient quality outcomes. I am and have been an adjunct faculty member at the San Diego State University School of Nursing, am currently on the San Diego Blood Bank Board of Directors, and continue to support Planetree International as a subject matter expert in person-centered care.

Research Interests

My research interests include patient and person-centered models of care and leadership.
