

Amoxicillin is a type of penicillin antibiotic.

You can tell other healthcare providers and pharmacists that your penicillin allergy was removed from the medical record as you have passed an oral amoxicillin challenge.

DO NOT re-label yourself as having an allergy to penicillin unless something new happens after you take penicillins in the future.

Name: _____

Oral Amoxicillin Challenge passed at Sharp _____ Hospital. Date/Time: _____

You are not penicillin allergic. You may safely receive the following classes of antibiotics:

- **Penicillins** (e.g. amoxicillin (Amoxil) or amoxicillin/clavulanate (Augmentin))
- **Cephalosporins** (e.g. cephalexin (Keflex®))
