Language (Interpretation) Services, 01206.99

PURPOSE

To delineate the steps by which language assistance (interpretation) and translation (of written material) services will be provided to limited and non-English speaking, (limited English,) and/or vision and hearing impaired (deaf) patients to ensure effective communication.

DEFINITION

- A. **Language Assistance (interpretation):** The act of listening to something spoken or reading something written in one language (source language) and orally expressing it accurately and with appropriate cultural relevance into another language (target language). Sign language is used by many people who are deaf or hard of hearing. It is a visually interactive language that uses a combination of hand motions, body gestures, and facial expressions. There are several different types of sign language, including American Sign Language (ASL) and Signed English. (See Attachment A: Available Interpretation and Translation Services for Sharp contracted services.)
- B. **Interpreter:** A person fluent in English and in the necessary second language, who can accurately speak, read, and readily interpret the necessary second language or a person who can accurately sign and read sign language. Interpreters shall have the ability to translate the medical plan, including body parts.

TEXT

- A. SHC has implemented procedures for providing, to the extent possible, as determined by the hospital, the use of an interpreter whenever a language or communication barrier exists.

- B. Interpreters are available, either on the premises or accessible by telephone or Video Remote Interpreting 24 hours a day.
- C. SHC personnel who fluently speak another language, other than English, may be utilized to interpret on a short-term basis for emergent interpreting needs until a contracted interpreter arrives.
- D. SHC **will offer interpreting services while the patient is hospitalized and will not** rely on interpretation by the patient's family and friends for medical information. The patient has the right to use the family member/friend as an interpreter but when possible, a qualified interpreter will also be present unless it is an urgent or emergent situation. The request should be documented in the medical record including the declination of outside services.
- E. SHC uses contracted interpreter services to obtain sign language interpreters.
- F. SHC Speech Pathologists are available for consultation for those with impaired speaking skills to facilitate communication.
- G. SHC Multicultural Services Department provides translation of written material.

PROCEDURE:

PROCEDURE:	RESPONSIBILITY:
<p>A. Upon admission/registration, a patient's primary language, plus dialect and any hearing impairment, will be identified and documented as follows:</p> <ol style="list-style-type: none"> 1. On the admission/registration screen. 2. On the ad hoc form – Patient Family Communication Note 	<p>A. Nursing/ Admitting</p>
<p>B. Language assistance will be offered to non-English speaking, limited English proficient, and deaf patients. Interpreter services will be provided to the extent necessary and possible, as determined by SHC.</p>	<p>B. Nurse/Provider</p>
<p>C. Communication barriers noted in the Electronic Medical Record will be addressed in the plan of care.</p>	<p>C. Nurse</p>
<p>D. The facility will give primary consideration to the non-English speaking, limited English proficient and deaf patients' choice or mode of communication (e.g., sign language interpreter, lip reading, written notes); unless it can be shown that an equivalent method of communication is available. Onsite sign language interpreter services may be obtained as follows:</p> <ol style="list-style-type: none"> 1. Only contracted companies may be used according to the service list. <ul style="list-style-type: none"> a. Consider the use of in-person interpreters for explanations of complicated or new diagnoses/prognoses, consents, and quality or end of life issues. 	<p>D. Nursing</p>

<p>2. Possible alternatives to onsite sign language interpreters include:</p> <ol style="list-style-type: none"> a. The use of written communication. b. VRI (Video Remote Interpreting) where available. Avoid the use of VRI if the person who needs the interpreter has difficulty seeing the screen (either because of vision loss or because he or she cannot be properly positioned to see the screen) or if there is difficulty maintaining a smooth, clear image of the interpreter's face, hands and upper body. In these circumstances, an on-site interpreter may be required. c. Computer Assisted Real-Time Transcription (CART) – Many people who are deaf or hard of hearing are not trained in either sign language or speech reading. CART is a service in which an operator types what is said into a computer that displays the typed words on a screen. This service would be available from SHC contracted interpreter services. 	
<p>E. Documentation of the following is to be placed in the EMR:</p> <ol style="list-style-type: none"> 1. Need for interpretation – include patient's primary language or hearing impairment 2. Offer of interpreter services and patient response 3. Interpretation mode, name of interpreter, and affiliation or relationship to patient 4. If interpretation by family or friend and reason why 5. Interpretation topic/information 6. If unable to provide interpretation service, reason why and circumstances 	E. Nursing
<p>F. When an immediate need for interpreter services other than sign language is identified on a unit/department, the unit requester will use over the phone translation. The speaker phone or dual handset phone is available to each unit.</p> <ol style="list-style-type: none"> 1. Attach the phone to the patient's phone line. 2. When all parties are present, call the language line – number is on the phone or phone is preprogrammed. 3. Proceed with the three-way (or more conversation). 	F. Nursing
<p>G. Isolation rooms:</p>	G. Nursing

<ol style="list-style-type: none"> 1. Cover phone with plastic bag, receiver remains intact. 2. Dial number from outside of plastic. Proceed with 3-way conversation via speaker. 3. After interpretation is complete, remove plastic bag and clean phone before storage with hospital approved microbial wipes. 	
<p>H. When a face-to-face interpreter is required for a scheduled time, contact one of the contracted interpreter companies listed on Attachment A to schedule an interpreter. Requester will need to provide the following:</p> <ol style="list-style-type: none"> A. Name of patient B. Time duration and date interpreter needed C. Location where interpreter will be expected. 	<p>H. Admitting/ Nursing/ Ancillary Departments</p>
