How to access SharpNET when not on Sharp network

Sharp HealthCare uses SecureAuth as its two-factor authentication provider.

1. Navigate to https://secure.sharp.com/secureauth2/.
2. Select "This is a public computer" or "This is a private computer."
    a. If private computer is selected, you won't be asked for a two-factor authentication.
3. Sign in with your Sharp username and password.

4. Select the delivery method for your passcode.

Please choose the delivery method for your Passcode.

○ SecureAuth - Push to Accept on _____'s iPhone

● SecureAuth - 6-digit Passcode from Desktop App

[Submit]

5. For SecureAuth push notification to work, you must allow notification for the app. To enable notifications:
    a. IPhone: Settings → Notifications → Authenticate → Allow Notifications
    b. Android: Settings → Notifications → Authenticate → Show Notifications

6. Confirm information is correct on self-service page. If box is unchecked, check the box and click "Update" to enable push notifications.
