

Sustainability Policy

Burnley Football Club recognises that its operations have an impact on the environment, particular in respect of carbon emissions.

Burnley Football Club also recognises that it has opportunities to change operational practice and infrastructure to reduce negative impacts on the environment, and where changes to operational practice are not feasible to undertake carbon offsetting activities.

Burnley FC is committed to:

- The UN Sports for Climate Action Framework
- Continually working to reduce the impact of Club operations on the environment via an annual action plan
- Considering environmental impact as part of the business decision making process
- Implementing an Environmental Management System which will review, monitor and measure performance and impact
- Being a leader and a role model in environmentally responsible business operations locally, nationally and internationally
- Communicating its sustainability work to all stakeholders
