## Welcome to the office of Galanis Cataract & Laser Eye Center

Our health team is dedicated to providing you and your family with the best possible medical treatment. Achieving your best vision is our mission.

Patients are seen by appointment only. We will try to honor your scheduled appointment time because we value your time. Please understand that medical emergencies do occur and in these circumstances, we ask for your consideration. If you cannot keep an appointment, we ask that at least 24 hours' notice be given to the office.

### Please bring the following with you to your first visit:

- Completed forms (enclosed)
- Insurance card(s)
- Medication list
- Eyeglasses and/or Contact Lenses
- Photo ID
- Insurance Co-Pay if applicable
- Insurance Referral from your Primary Care Doctor if applicable

### Precautions Following Dilation:

It may be necessary to dilate your eyes during your eye examination or treatment. Dilation results in sensitivity to light and an inability to see well at close range or distance for a few hours. We do allow our patients to drive after dilation. If you are uncomfortable driving we recommend that you arrange to have someone drive you home.

### Surgery Evaluations:

- ***Please allow approximately 2 1/2 hours for this first exam and testing.***
- Surgical evaluations for **cataract or LASIK**, we do recommend you stay out of your contact lenses for 2 weeks prior to your visit. Also, please start using "over-the-counter" artificial tears 3 days prior to your exam.
- To archive the best possible outcome for your vision and overall eye health, a variety of high-end/state-of-the-art technology will be used during your evaluation.
- You will meet with our surgical staff to discuss your surgical journey and options.

## **INFORMATION ABOUT REFRACTION**

### **What is Refraction?**

Refraction is a testing procedure that measures how much optical (focusing) error an eye has. Certain eye measurements are taken using a variety of instruments. Based on these measurements, a series of trial lenses are placed in front of your eyes, and you are asked to compare one lens with another to determine which lens combination offers you better vision. This leads to a determination of how well you see and can be used to write a prescription for eyeglasses.

### **Why Doesn't Insurance Pay for Refraction?**

Most health insurance plans were not designed to pay for routine procedures. Medicare, Medicaid, and most private policies will not pay for refraction because it is considered routine.

### **Who Has Decided That Refraction is Not Covered?**

It is our government (for Medicare and Medicaid) or your insurance company that determines exactly which services are covered, not your individual physician.

### **What is Our Policy?**

In order to provide the very best eye care, refraction will be performed for all new patients, those presenting with decreased vision and on a yearly basis thereafter. Private insurance plans will be billed \$70.00 for refraction but you will be responsible for a fee for service rate of **\$50.00** if no vision coverage is available. **Medicare patients will be responsible for paying \$50.00 at the time of your visit in addition to any co-payments or deductible due.**

I understand that refraction is a **non-covered** service. I accept full financial responsibility for the cost of this service in addition to any co-payments or deductible.
