Dotmatics Scientific R&D Platform

An open portfolio of interoperable, industry leading products

Meet the Dotmatics Scientific Platform

The Dotmatics Scientific Platform brings together the best of breed applications for scientific informatics and connects them on a single platform with a strong core which includes, ELN, Data Management Product, Screening and Instrument Integration using the same data code. This brings high utility for scientists and analysts using the data who may not be data process experts but domain experts.

A platform running core capabilities and applications pre-configured for specific use cases and workflows, enables collaboration with multiple teams to capture synthetic details, register compounds, request work orders utilizing the same data and scientific software.

The single data source centralized, and aggregated enables greater discovery power utilizing multiple streams of data, ultimately reducing workflow and data complexity.

Dotmatics Scientific R&D Platform

An open portfolio of interoperable, industry leading products

Solutions

Pre-configured use cases & workflows

Biology

Antibody Discovery
CAR-T Cell Therapy
RNA Therapeutics

Chemistry

Small Molecule Drug Discovery
Oligos
DNA-Encoded Libraries
Peptides

Chemicals & Materials

Formulations Innovation
Process Optimization

Core

Products and Capabilities that serve as the core of the Dotmatics Scientific Platform

Electronic Lab Notebook

- Inventory
- Registration
- Request Management

Data Discovery

- Data Aggregation & Search
- Visualization

Screening

- High Throughput Screening

Instrument Integration*

Scientific Tools

Market-leading specialized products built by scientists, for scientists.

SnapGene, geneious prime, geneious biologics	*Bioinformatics*
Vortex	*Cheminformatics*
OMIQ, FCS Express, Cytapex	*Flow Cytometry*
PROTEIN METRICS	*Proteomics & Biologics Characterization*
Prism	*Data Analysis & Visualization*

Integrations with third-party systems

On-premise or in the cloud

**For targeted use only*

Products Capabilities

Dotmatics Biology Solution

An open portfolio of interoperable, industry leading products

Solutions

Pre-configured use cases & workflows

Biology

Antibody Discovery
CAR-T Cell Therapy
RNA Therapeutics

Chemistry

Small Molecule Drug Discovery
Oligos
DNA-Encoded Libraries
Peptides

- Inventory
- Registration
- Request Management

Data Discovery

- Data Aggregation & Search
- Visualization

Screening

- High Throughput Screening

Instrument Integration*

Scientific Tools

Market-leading specialized products built by scientists, for scientists.

SnapGene, geneious prime, geneious biologics — *Bioinformatics*

Vortex — *Cheminformatics*

OMIQ, FCS Express, Cytapex — *Flow Cytometry*

PROTEIN METRICS — *Proteomics & Biologics Characterization*

Prism — *Data Analysis & Visualization*

Integrations with third-party systems

On-premise or in the cloud

**For targeted use only*

Products Capabilities

Dotmatics Chemistry Solution

Dotmatics Scientific R&D Platform

An open portfolio of interoperable, industry leading products

Discover the first end-to-end data informatics platform with best-in-breed applications.

Dotmatics has created a different approach with an end-to-end ecosystem of best-in-breed software that you already know, including: GraphPad Prism, SnapGene, Geneious Prime, Geneious Biologics, and others.
