

## About The Hans Knöll Institute

[The Leibniz Institute for Natural Product Research and Infection Biology](#) – Hans Knöll Institute – was founded in 1992 and has been a member of the Leibniz-Association since 2003.

Scientists at the HKI carry out research on natural products from micro-organisms and on the infection biology of pathogenic fungi. Novel discoveries of natural products are investigated for their biological activity and modified purposefully for possible drug applications.

*“Dotmatics Vortex will enable our scientists to evaluate large datasets in a rich, and flexible visualization environment and set the stage for new therapeutic approaches for infectious diseases.”*

**Dr Florian Kloss**  
Head of the Transfer Group Anti-infectives

*“We are delighted that the Hans Knöll Institute has chosen to work with Dotmatics enabling researchers to exploit all their R&D data to better inform scientific decision-making.”*

**Erran Twigg**  
VP of Sales, EU, Dotmatics
