STEP 1

Place the Shelf (A) on the wall in a chosen location. Ensure the Shelf (A) is level and mark the locations for the screws (C) / anchors (B) using the dimensions in the diagram below as reference.
Wood or Stud installation:
Use a Phillips head screwdriver to fasten the screws (C) directly into the wall at the marked locations. Leave 1/8 - 3/16" or 3 - 10 mm between the top of the screws (C) and the wall.

Drywall installation:
Insert anchors (D) into the wall at the marked locations using a drill and a hammer. Insert screws (C) into the anchors, then tighten with a Phillips head screwdriver or drill. Leave 1/8 - 3/16" or 3 - 10 mm between the top of the screw (C) and the wall.

The included hardware is intended for attachment to drywall or wooden wall surfaces. Contact your local hardware store to find the correct anchor for alternative wall types such as stone or brick.

STEP 2

Gently hang the shelf (A) on the screws (C). If the shelf (A) slopes downward, tighten the gap between the top of the screws (C) and the wall.
