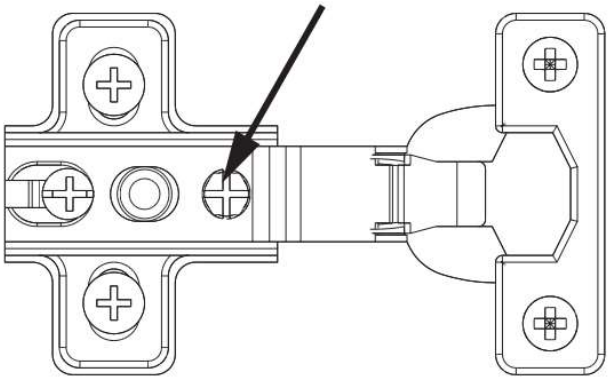
STEP 2

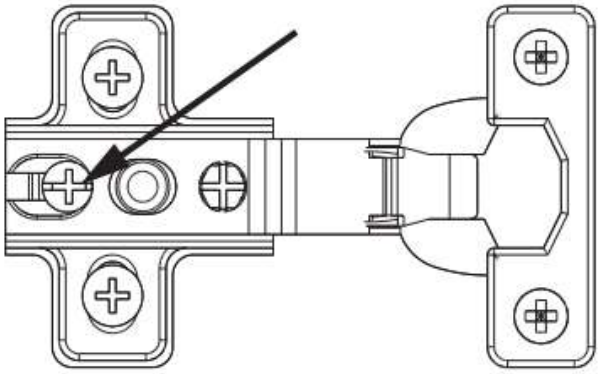
Use a Phillips head screwdriver and the diagrams below to align the doors if necessary. Perfectly aligned doors are unachievable on highly uneven floors.

DO NOT FULLY LOOSEN THE SCREWS!

- Left & Right: Loosen / Tighten screw to adjust.



- Front to Back (depth): Loosen screw to adjust.



- Up & Down: Loosen screw to adjust.

STEP 3

A) Align the bracket (F) to the top back of the cabinet, as shown. Insert screws (H) and tighten with a Phillips head screwdriver (not included). Place the second bracket (F) against the wall directly behind the storage cabinet and mark the location.

B) Wood or Stud installation:
Insert the screws (G) through the second bracket (F). Then, use a Phillips head screwdriver to fasten the screws (G) directly into the wall at the marked location.

Drywall installation:
Contact your local hardware store to source the correct anchor for your wall, use any screws included with wallanchor kits to attach anti-tip kit brackets to the wall. Insert the wall anchors into the wall at the marked locations. Insert the screws (G) through the second bracket (F) and into the anchors, then tighten with a Phillips head screwdriver (not included).

C) Place the storage cabinet against the wall aligning the brackets (F), then run the Strap (E) through both brackets (F) and pull it tight to secure the shelf.
