

COMPLETE PERFORMER BALANCED FEED SIMPLIFIED

Premixed feeds are developed to make feeding horses simple, but for many horse owners the feed is only a part of what goes into the feed bin. What should be simple becomes complicated, and is then prone to mistakes.

Barastoc Complete Performer is a muesli feed with added chaff so you can dipper it straight out of the bag into the feed bin without adding extras. You don't need chaff, it's already there. You don't need salt, it's in the feed. You don't need supplements as the feed contains high levels of vitamins and minerals and the antacid Gastrolize™.

Unlike feeds with loose vitamins and minerals which can fall to the bottom of the feed bag or feed bin, Barastoc Complete Performer contains a Nutribits pellet to carry amino acids and the Kentucky Equine Research (KER) vitamin and mineral premix, and make sure it's not sifted out and left in the bottom of the bin.

A small amount of molasses helps keep feeds dust free and palatable, and Barastoc Complete Performer is well known to be tasty for even the pickiest eater.

Unlike some high energy feeds, which are easy to over feed, Barastoc Complete Performer is a low energy and safe feed that doesn't risk upsetting the often-delicate balance in the horse's digestive tract, or behavioural equilibrium.

Prepared feeds should make feeding easy and effective, and that's exactly what Barastoc Complete Performer will do for your feeding program. Hence the name - Complete!

What will it do for my horse?

- ✓ Contains the natural equine antacid, Gastrolize™ for horses prone to gastric ulcers.
- ✓ Bio-available Calcium and Magnesium to maintain correct nervous system function.
- ✓ DHA and EPA Rich Omega Essential Fatty Acids to support immune function and reduce inflammation reduction, aiding in recovery from work, injury or stress.
