# OUR RANGE OF HORSE FEEDS & SUPPLEMENTS

## EQUESTRIAN

A complete range, tailored for light to moderate activity levels.

### CALM PERFORMER

Cool performance pellet

### COMPLETE PERFORMER

High fibre, oat-free muesli

### LOW CAL CRUISER

Low energy horse and pony pellet

## PERFORMANCE

A comprehensive range nutritionally balanced for moderate to high energy requirements.

### SUPREME

Low dose muesli concentrate

### COMPETITOR

Fully fortified performance pellet

### COMMAND

High energy, oat-free muesli

### WORK HORSE

High fibre, oat enriched mix

## BREEDING

A balanced and therapeutically beneficial range specifically designed for breeding & stud requirements.

### BREED N GROW

Fully fortified pellet

### LEGEND

Oat-free muesli concentrate

### KER STUD BALANCER

Balancer pellet

### PREPARE

Fully fortified muesli

### STUD N SPELL

Breeding & spelling pellet

## RACING

A range of high-performance race feeds, nutritionally balanced to aid performance & recovery.

### FURLONG

Oat-based racing feed

### SYNERGY

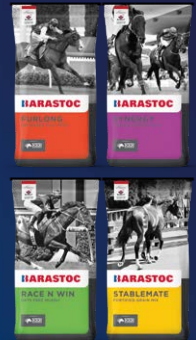

Racing concentrate

### RACE N WIN

Oat-free muesli

### STABLEMATE

Fortified grain mix

## SPECIALTY

A range of supplementary feeds for support in diverse conditions, changing environments and health conditions.

### BARASTOC

#### FIBRE-BEET™ MASH

Quick soaking conditioning & rehab feed

#### KER LOW GI CUBE

Specialty cube

#### SENIOR

Support pellet

#### STEAM FLAKED BARLEY

Blended grain

#### SPEEDI-BEET™

Quick soaking beet pulp for conditioning

#### ALL-PHASE

Balancer pellet

#### EQUI-JEWEL

Topline conditioner

## SUPPLEMENTS

A range of supplements to promote the health and well-being of your horse.

### GROOM

Multi-vitamin & mineral supplement

### REBALANCE

Horse mineral & vitamin block

### At Barastoc, horses come first

Not everyone gets it. Not everyone knows the magic of a horse, nuzzling your palm on a cold, dewy morning. Or the reasons why weekends, early mornings or the middle of the night are the times when horses come first.

But horse people get it.

Having a horse isn't just a lifestyle. It's a whole life. To create an environment where horses don't just feel at home, they thrive. To find the perfect mix of feed that makes them shine – inside and out. Horse people know that it is about more than just care, or even love. It's a passion. And horses always come first.

We are horse people too. Supporting your passion is our passion too. That's why we don't just make feed. We support young riders, local communities and Aussie farmers. We've been doing it for over 50 years and were not stopping anytime soon.

## HOW WE CAN HELP

Barastoc's high-end horse feed and horse supplements cater to the varying needs of your horse, including their physical health, conditioning and overall quality of life.

### GASTROLIZE™

Found in many Barastoc feeds, Barastoc Gastrolize™ is our gentle slow-release buffering agent for horses prone to gastric ulcers. It provides an intense and persistent buffering capacity that may assist with maintaining a higher pH over a prolonged period. Barastoc Gastrolize™ also facilitates the higher uptake of nutrients and minerals from the intestinal wall, helping them benefit from the vitamins and minerals in their feed.

### DIAMOND V®

The all-natural, fermentation based product, Diamond V® promotes robust digestive health, and improves the resilience and functions of your animal's immune system. Research has shown that Diamond V® also assists recovery from work, injury or stress by reducing systemic inflammation. Select a premium horse feed featuring Diamond V® to enhance your horse's gut microbiome and improve growth rates in young horses.

### SUPER FIBRES

Highly fermentable, Superfibres are easily digestible, have energy levels much higher than typical forages and provide cool, slow-release sustained energy. Found in many Barastoc feeds, Barastoc Superfibres™ are naturally low in starch and sugar free. In addition, Superfibres help to promote gut health, improve nutrient absorption and act as a water reservoir to help prevent dehydration.

BREEDING FEEDS

## PREPARE FULLY FORTIFIED MUESLI

The ultimate full feed muesli for brood mares, breeding stallions, weanlings and yearlings.

SAFE CONDITIONING

BONE STRENGTH & DEVELOPMENT

ASSISTS WITH FERTILITY

### WHAT WILL IT PROVIDE MY HORSE?

Formulated with high quality protein and added essential amino acids to provide the building blocks of muscle and topline for sales preparation.

Provides the essential antioxidants Vitamin E and Selenium to assist with fertility for both stallions and mares.

Formulated with three absorbable sources of calcium, with phosphorous and magnesium to ensure there are sufficient levels of these building blocks for strong bones and joints.

Contains Diamond V® to promote gut health and improve calcium and phosphorous digestion.

### TYPICAL NUTRITION ANALYSIS OF BARASTOC PREPARE (PER KG FED)

NUTRIENT LEVELS	
Est Digestible Energy	12.5MJ
Min Crude Protein	16.0%
Min Crude Fat	5.0%

Steam Flaked Barley, Steam Flaked Corn, Steam Flaked Lupins, Oats, Sunflower Seeds, Protonise™ Pellet containing KER Vitamin & Mineral Premix, Omega Rich Vegetable Oil, Molasses, Salt, Gastrolize™ - Equine Antacid, Lysine, Methionine, Diamond V®.

### HOW MUCH SHOULD I FEED MY HORSE?\*\*\*

FEEDING GUIDE Suggested Feeding Rate (Kg / Day)			
Bodyweight (Kg)	Development Stage		Feeding Rate (Kg/Day)
100 – 200	Creep Feeding Foals	2 – 5 months of age	1.0 – 2.0
200 – 300	Weanlings	5 – 12 months of age	2.0 – 3.0
300 – 400	Yearlings	12 – 18 months of age	3.0 – 4.0
500	Pregnant Mares	Last 3 months	5.0 – 6.0
500	Lactating Mares	First 3 Months	5.0 – 6.0
500	Breeding Stallion	-	2.0 – 5.0

## STUD N SPELL BREEDING & SPELLING PELLET

Barastoc Stud N Spell pellets are created with a low starch formula to assist in creating a lower glycaemic index diet to assist in reducing growth and development disorders. The low starch formula is also ideal for spelling and horses recuperating after long physical campaigns.

HIGH  
NUTRITIONAL  
VALUE

IMMUNE SYSTEM  
SUPPORT

BALANCED  
NUTRITION

### WHAT WILL IT PROVIDE MY HORSE?

Fortified Vitamin and Mineral formula to assist in maintaining skeletal integrity, immune function and recuperation.

Pelleted formula to ensure nutritional consistency.

Lower feeding rate to ensure nutritional requirements are satisfied.

Available in 500kg bulka bags, 1 tonne bulka bags and bulk direct to farm delivery.

### TYPICAL NUTRITION ANALYSIS OF BARASTOC STUD N SPELL (PER KG FED)

## RACING FEEDS

A range of high energy performance race feeds,  
nutritionally balanced to aid performance and recovery

# BARASTOC

## FURLONG OAT-BASED RACING FEED

Premium, nutrient rich full-oat feed designed for high performance equine athletes in full race training.

**BONE STRENGTH & DEVELOPMENT**

**SUSTAINED ENERGY**

**RELIEF FROM ULCERS**

**SUPERIOR MUSCLE DEVELOPMENT**

**ANTIOXIDANTS TO AID RECOVERY**

### WHAT WILL IT PROVIDE MY HORSE?

Formulated with Diamond V® for improved utilisation of fibre, gut health and reduced lactic acid accumulation during exercise.

Contains KER Buffered Mineral Complex™ (BMC) for bone strength and mineralisation.

Contains a natural equine antacid, Barastoc Gastrolize™, for horses prone to Equine Gastric Ulcer Syndrome.

High in essential amino acids and branch chain amino acids (BCAA), to assist in superior athletic muscle development and repair.

Enriched with natural Vitamin E to aid muscle recovery for improved stamina.

### TYPICAL NUTRITION ANALYSIS OF BARASTOC FURLONG (PER KG FED)

## SPECIALTY FEEDS

A range of feeds to support horses in diverse conditions, changing environments and with health conditions.

# BARASTOC

SPECIALTY FEEDS

## Fibre-Beet® MASH

CONDITIONING FIBRE NO FIZZ FORMULA

A low sugar, high fibre conditioning feed that targets overall condition including; weight gain, topline, muscle tone and function, coat and hoof health.

TOPLINE BUILDER

HIGHLY PALATABLE

SAFE WEIGHT GAIN

PROMOTES GUT HEALTH

### WHAT WILL IT PROVIDE MY HORSE?

Condition through optimised gut health:

Added Speedi-Beet™ and oat fibre - acts as a natural prebiotic (feeds beneficial bacteria) and is a great source of fermentable fibre (it's been shown that the horse can absorb up to 25% more of the nutrients in Barastoc Fibre-Beet® Mash).

Added Lucerne - provides high quality protein (wide range of BCAAs - supporting recovery of body condition, muscle tone & function).

Low in sugar and starch - providing condition without the fizz and suitable for horses and ponies prone to laminitis.

Added Biotin to support hoof and coat condition.

Soft, safe and palatable feed for recovery and senior horses.

### TYPICAL NUTRITION ANALYSIS OF BARASTOC FIBRE-BEET® MASH (PER KG FED)

# Speedi-Beet®

Quick Soaking Beet Pulp Flakes

Suitable for equines prone to non-glandular gastric ulcers as part of a balanced diet

## The World's No.1 Quick Soaking Beet Flakes

Available around the world in 24 countries, Speedi-Beet is fast, convenient and is the healthy option for thousands of horse owners who now use the product and rely on its benefits.

### Its key benefits are:

- Quick soaking and Convenient
- Unmolassed - 95% SUGAR FREE
- Ideal Fibre source for horses prone to laminitis
- Low sugar / starch
- High digestible fibre
- Non-GM
- Rapid re-hydration
- Non-heating
- Slow release energy
- Excellent complementary feedstuff to hard feed
- Extremely palatable (ideal for fussy eaters)
- Excellent top dressing.
- Improved Nutrient Availability. Unique patented processing allows release of nutrients prior to hind gut fermentation
- Stimulates beneficial gut bacteria
- Excellent source of pectins, betaine and non-structural glucose.
- More hygienic than traditional sugar beet feeds, due to the quick soaking time.
- Speedi-Beet is made from pure unmolassed sugar beet pulp, no additives or flavours.

### CONTAINS THE FOLLOWING RAW MATERIALS:

# All-Phase®

## BALANCER PELLET SUITABLE FOR EVERY PHASE OF YOUR HORSE'S LIFE

### WHY CHOOSE ALL-PHASE?

- Features a low-intake, low-energy formulation that meets the needs of breeding, growing, performance, and spelling horses.
- Provides high levels of amino acids for optimal growth and muscle development.
- Delivers a fully-fortified balancer to provide a source of essential nutrients to balance the diet for good doers, horses not requiring additional calories, or horses on an unfortified ration.
- Supports young, growing horses to prevent developmental orthopaedic disease (DOD) or as a sole concentrate for horses affected by DOD.
- Contains high levels of biotin, organic zinc, and methionine to boost hoof growth and quality.
- Provides a source of high-quality vitamins and minerals to ensure optimum growth in young horses and to maximise fertility in breeding stock.
- Features a yeast metabolite postbiotic that supports digestive health.
- Contains natural vitamin E and organic selenium for maximum bioavailability to support antioxidant defences and immunity.
- Contains organic trace minerals shown by research to increase bone mineralisation, immune response, coat quality, and hoof health.

### FEEDING RECOMMENDATIONS

Mix **All-Phase®** with chaff or grain, or feed it by itself. Adjust additional grain intake according to needs based on body condition, growth rate, and available forage.

**Feed 500g** foals, spelling horses, dry mares, ponies, horses at maintenance

**Feed 750g** for horses in light work and spelling horses

**Feed 1kg** for weanlings, yearlings, mid to late pregnant mares, lactating mares, stallions, hard-working horses, aged horses

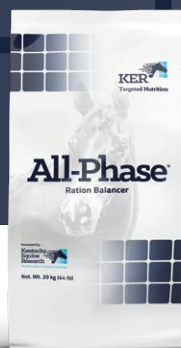

The above daily recommendations are for horses with an expected mature body weight of 500kg. Adjust according to the expected mature weight of your horse.

### AVAILABLE PACK SIZES

# Equi-Jewel®

## BUFFERED, HIGH-FAT, COOL-ENERGY CONDITIONER

The correct balance of energy sources is vital for successful conditioning. Fat is a concentrated energy source and often an important component in the diets of hard-working horses and horses that have difficulty increasing or maintaining body condition. Fat has several other advantages.

Energy derived from fat does not make some horses reactive or flighty like energy from grain, and horses on high-fat diets exhibit more endurance. Equi-Jewel® is an excellent product for improving body condition and topline of thin horses because it is a combination of rice bran and highly digestible fibre.

Equi-Jewel® is a stabilised rice bran conditioner of premium quality and palatability.

Equi-Jewel® not only provides cool, slow-release energy, but also has the added benefit of supporting gut health. Equi-Jewel® contains KER BMC™, which is more digestible than other forms of calcium, including calcium carbonate. KER BMC™ increases the buffering capacity of the stomach, thereby reducing the risk of ulcers, and moderates the pH of the hindgut to prevent hindgut acidosis that can disturb the vital microbiome.

Equi-Jewel® also contains the essential fatty acid linoleic acid, which can reduce gastric acid secretion and increase output of protective prostaglandins, making Equi-Jewel® an important component in the diet of horses at risk of gastric ulcers and hindgut disturbances.

Equi-Jewel® provides performance horses with a highly palatable form of additional calories, fibre, and protein to assist in building muscle and maintaining condition.

### WHY CHOOSE EQUI-JEWEL?

- Offers the ideal conditioning supplement to increase body condition, topline, and coat condition in show, sales preparation, breeding, and performance horses.
- Provides a safe source of calories for horses requiring a low-carbohydrate diet, such as those intolerant to grain, prone to tying-up, and horses with gastric ulcers.
- Enhances digestive health through the inclusion of KER BMC.
- Supports horses competing over long-distance or endurance rides that benefit from slow-release energy.
- Provides low-glycaemic calories (glycaemic index (GI) below 50), compared to beet pulp (GI of 70) and common sweet feeds (GI of over 100).
- Delivers antioxidants, vitamin E, and organic selenium to assist with muscle recovery in performance horses and to support a healthy immune function.
- Contains added calcium to balance the high phosphorus level found naturally in rice bran.

### AVAILABLE PACK SIZES

20kg bag

NUTRITIONAL CONTENT	1KG
Digestible Energy	18MJ/kg
Crude Protein (min)	13%
Crude Fibre (max)	13%
Crude Fat (min)	18%

### WHAT WILL IT PROVIDE MY HORSE?

Protein and mineral supplementation to balance pasture deficiencies.

Formulated with added molasses for palatability and ready acceptance.

Packaged in an edible carton.

High quality vegetable protein source, with essential amino acids required for maintenance, growth and tissue repair.

May assist horses grazing oxalate rich pastures.

### HOW MUCH SHOULD I FEED MY HORSE?^^

The recommendations provided are intended as a guide only. If you are feeding any other fortified feeds and/or supplements please consult a veterinarian or equine nutritionist. The amount fed will vary according to the horse's condition and the quality of pasture and/or roughage available.

- Provide one block for up to 10 horses and replace as necessary.
- Usual intake: 100-300 grams per head per day.
- Place blocks in high, well drained location.
- Ensure a plentiful supply of pasture or hay is available when feeding this product.

For a more detailed feeding rate or an individual diet analysis, please contact us via our website, [www.barastochorse.com.au](http://www.barastochorse.com.au)

## **BARASTOC & KENTUCKY EQUINE RESEARCH**

### **A PERFECT PARTNERSHIP IN EQUINE NUTRITION**

We've partnered with Kentucky Equine Research who have over 30 years global experience researching equine nutrition and physiology. Together, we work closely with an international network of world class equestrians, horse breeders and trainers to produce feeds that deliver real results. Kentucky Equine Research's experience, combined with our vast knowledge of Australian horses and conditions, makes Barastoc feed ideal for your horse.

This Barastoc feed has been fortified with the balanced KER micronutrient complex to ensure that your horse gets the nutrition it needs to be healthy, look great, behave well and perform at its best.

**British Horse Feeds**

## **BARASTOC & BRITISH HORSE FEEDS**

Our dedication to excellence in nutrition led Barastoc to forge an exclusive partnership with British Horse Feeds, the world leader in the development of beet pulp based feed for horses. Made using only the best quality single source British beet pulp, Speedi-Beet™ and Barastoc Fibre-Beet® Mash are subjected to a patented cooking process to produce a palatable and all-around superior beet pulp for horses. This means the best and most consistent specification you can achieve that contains;

### **NO TOXIC PRESSING AGENTS**

(eg Aluminium Sulphate)

### **NO GLYPHOSPHATE USED TO HARVEST**

### **NO GMO BEET USED**

### **NO "ROUNDUP READY" BEET USED**

*Not all beet-pulp is created equal!*

\*For feeding of horse with any undelying issues such as Hoof Conditions, Laminitis, Big Head, Fussy Eating, Tying Up, Metabolic Disorder, Joint Health, Ulcer Releif please contact Barastoc Equine Nutritoin Team or fill a DAR for in our website.  
\*For a achiving the best results please feed at each product recommended rates or contact Barastoc Equine Nutrition team for a custumise feeding solution

### Terms and Conditions

\*The recommendations provided are intended as a guide only. The amount fed will vary according to the horse's condition and the quality of pasture and/or roughage available. This feed can be used to supplement grazing and/or high-quality roughage to not more than one half of the horse's daily feed intake by weight. Introduce this feed gradually over a two-week period. Intake less than the levels listed may require additional vitamin and mineral supplementation. For horses or ponies with an estimated weight substantially below or above 500kg please consult Barastoc for a more detailed feeding rate and diet analysis.

\*\*Do not feed more than 2.5kgs of this product per meal. Intakes less than the levels listed may require additional vitamin and mineral supplementation.

^The recommendations provided are intended as a guide only. If you are feeding any other fortified feeds and/or supplements please consult a veterinarian or nutritionist. For larger horses please consult Barastoc. Introduce this product gradually over a two-week period. Intakes less than the levels listed may require additional vitamin and mineral supplementation

^^If you are feeding any other fortified feeds and/or supplements please consult a veterinarian or nutritionist. For larger or smaller horses please consult Barastoc. This feed has been formulated specifically for animals as described on the bucket, and must not be used for other species of animals.

+The recommendations provided are intended as a guide only. Barastoc KER Stud Balancer can be used to supplement grain and forage, or just forage based diets. The concentrate portion should be not more than one half of the horse's daily feed intake by weight. Adjust concentrate intake according to need based on body condition, growth rate and available forage. Introduce this product gradually over a two-week period. For horses or ponies with an estimated weight substantially below or above 500kg please consult Barastoc for a more detailed feeding rate and diet analysis.

++Do not feed more than 1.5kgs of this product per meal. Intakes less than the levels listed may require additional vitamin and mineral supplementation.

-For Sheep/Cattle/Goats: feed up to 1% of bodyweight per day. The recommendations are intended as a guide only. The amount fed will vary according to the horse's condition and the quality of pasture and/or roughage available. Barastoc Steam Flaked Barley with Molasses should be used to supplement grazing and/or high-quality roughage, with a fortified feed or supplement, to not more than one third the horse's daily feed intake by weight. Introduce this product gradually over a two-week period starting with only 500 grams per day.

#The recommendations provided are intended as a guide only. The amount fed will vary according to the horse's condition, weight, stage of training and additional supplementary feeds used. Intake less than the levels listed may require supplemental vitamin and mineral supplementation.

## NOTES

*horses come first*

At Ridley we are passionate about providing tailored animal nutrition solutions to a diverse range of customers, from commercial farms through to backyard enthusiasts, to feed all types of animals including poultry, dairy cows, beef cattle, pigs, sheep, fish, prawns, horses, dogs and lifestyle animals.

Every product we sell is backed by our investment in a dedicated team of world class nutritionists, modern manufacturing facilities with strict quality standards, and research and development that keeps us at the forefront of advances in animal nutrition and science.

Ridley; proudly working side-by-side with Australians who feed animals for a living or count them as part of their family.
