

Beauty Starts from Within

BARASTOC (Ridley)

The real secret to a glossy coat and a healthy horse is the right nutrition so start your horse's beauty regime today. Barastoc Groom is a complete vitamin & mineral supplement designed to support hoof and coat health and to enhance the well-being and appearance of your horse.

Feeding Barastoc Groom establishes a solid foundation for your horse's health, promoting 'bloom' and dapples in your horse's coat, making it a window to their inner health.

Barastoc Groom is designed to support hoof and coat health and to enhance the well-being and appearance of your horse.

WHAT WILL IT DO?

We retained the same macronutrients that assist in developing topline and maintaining a healthy shiny coat.

Barastoc Groom will deliver all the nutrients a horse requires every day. It also contains essential amino acids, restorative levels of Biotin, Zinc and Methionine to enhance hoof conformation and structure as well as promoting soft hair development.

Added yeast metabolites to promote a healthy gastro intestinal tract that;

- Increases immune function and the digestion of minerals such as calcium and phosphorous. These metabolites have also shown in research to reduce lactic acid levels in performance horses.
- Improves utilisation of minerals and fibre, and enhance gut microbiome

You may also find it can aid Laminitis recovery through keratinisation of connective hoof and lamina tissues.

Start your horse's inner health journey today by supplementing their diet with Barastoc Groom.
