

BARASTOC

ADVANCED FEED SOLUTIONS

Tailored to meet the needs of your horses, your operation and your goals.

BARASTOC

Your Horses Drive Your Business

As leaders of animal nutrition science we continue to invest in innovation and our people.

Our specialised equine nutrition team brings vast experience in equine nutrition, breeding and training, in addition to commercial business management.

We're a team of passionate horse people with decades of both hands-on experience and technical qualifications, we understand your passion and are dedicated to help you achieve your goals.

Barastoc provides the best nutrition for your horses and the best feeding solutions for your equine business.

Quality You Can Count On

We are respected for the quality and performance of our products, for our service and expertise, for our continual innovation and improvement, and for our commitment to the people who make a living rearing and caring for animals.

Every product we sell is backed by our investment in world-class manufacturing facilities that operate according to strict quality and food safety standards.

At Ridley, we are relentless in our commitment to quality through a fully-integrated Quality Management System (QMS) that incorporates all aspects of Good Manufacturing Practices (GMP), food safety, and HACCP programs.

Our QMS program has been developed in accordance with Australian and international standards, and is independently certified by third party accreditation organisations.

Quality and safety standards are applied to every part of our business, from the receipt of raw materials right through to the despatch of finished products. This ensures a safe, quality feed for your horses, and peace of mind for you.

All Ridley sites are FeedSafe® accredited by the Stock Feeds Manufacturers' Council of Australia and are HACCP certified. Like our own Quality Management System, FeedSafe® and HACCP are underpinned by Good Manufacturing Practice (GMP). The Feedsafe® program has been developed in conjunction with the Chief Veterinary Officers within each State, and the final document has Primary Industries Ministerial Council endorsement.

Feed Delivered Just How You Like It

Every business is different, and sometimes you'll have specific results in mind that you're not quite getting from existing feeds. If you're looking for that extra edge, Barastoc can work with you to customise feeds specifically for your horses.

The first step in preparing a customised diet is for us to develop a good understanding of your horses, your property (including pasture and water testing) and your goals.

20kg Packs

Armed with information about your operation, our team will develop a diet that is tailored specifically for your needs.

Call us to arrange a visit from one of our equine specialists.

We have the capability to deliver bulk feed by truck direct to your silo, and in multiple pack types and sizes to suit your operation's needs.

Truck to Silo Delivery

500kg & 1 Tonne Bulk Bags

We have the capability to customise feeds specifically for your horses.

World-Class Nutrition

Barastoc is home to one of Australia's largest teams of qualified equine nutritionists. Our equine nutrition team have the technical skills to ensure your horses receive the best nutrition available.

We aim to continually provide sustainable improvements in performance through new knowledge, new feeds and new technologies.

This enables us to provide a tailored, specialised approach to equine nutrition, which targets the individual needs and the unique requirements of your equine operation.

Our equine nutritionists play a vital role in assessing the nutritional needs of individual horses, developing new horse feeds, preparing equine diets, and providing practical advice and recommendations to suit your budget.

A Leading Partnership in Equine Nutrition

Barastoc is proud to be a KER Balance Partner.

Through extensive testing, quality control and research we are confident that the health and wellbeing of your horses is at the heart of everything we do.

Kentucky Equine Research has over 30 years' global experience researching equine nutrition and physiology. Our partnership combines this expertise with Barastoc's capabilities and over half a century of experience producing the finest quality Australian feeds.

Working together with Kentucky Equine Research, we can incorporate the latest scientific findings from around the globe to guarantee your horses get the nutrition they need to grow, produce and perform at their best.

KER partner feeds are balanced with a custom blend of micronutrient ingredients designed to deliver the optimal amount and correct balance of critical vitamins and minerals to each class of horse for breeding, performance, and overall health.

Gro-Trac® is the first equine growth-monitoring software that allows breeders to compare the growth rates of their stock with those of young horses of similar age, sex and breed from the same country, or from around the world.

Over the last 20 years, Thoroughbred breeders internationally have been working with scientists at Kentucky Equine Research Inc. collecting growth data from their young Thoroughbreds. Body weight, wither height and body condition score data has been collected from nearly 20,000 Thoroughbreds in the USA, England, Ireland, Australia, New Zealand, South Africa, and India. By using this database of growth records, breeders can quickly assess, track and manage foals and yearlings from birth within the Gro-Trac® programme.

Pasture & Hay Analysis

The quality of your pasture and hay sources can have a significant impact on the health of your horses and can contribute to specific nutritional 'gaps' in their diets.

Our team bring years of specialist expertise to the sampling, testing and analysis of your pasture and hay to design an affordable and effective feeding solution.

24/7 Online Diet Analysis

At Barastoc, we want your horses to perform at their best and we believe this can be achieved with a balanced feeding program.

By analysing each horse's diet and taking into account their age, workload, type and body condition, we can help you design a feed program that meets all of your horse's daily requirements.

Information provided online is personally reviewed by our equine nutritionists who will make diet recommendations and correct the balance of nutrients for your horse's individual needs.

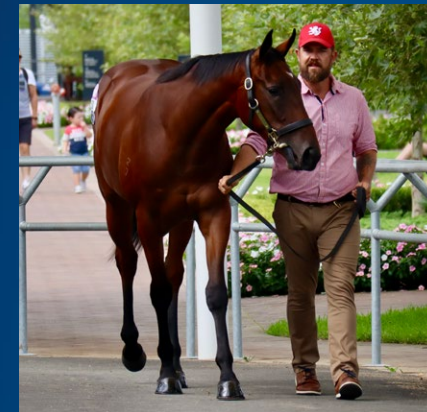

Sales Preparation

Professional preparation is the key to achieving profitable results in the sale ring, and the right preparation starts with the right nutrition.

The Barastoc team are highly experienced in preparing horses for sale, and know that the correct balance of development, growth and condition begin with a precise feeding program.

Our team will develop a tailored nutrition plan so your draft gain the attention from the leading bloodstock judges.

MicroSteed® Ration Wizard

MicroSteed® is an online program developed by Kentucky Equine Research to help you make fast, informed choices about choosing your feeding program.

By building a profile for each horse, MicroSteed® will present a range of Barastoc feeds that have been preselected as most appropriate for your horse's situation.

These results will provide a ration that meets your horse's energetic, developmental and nutritional requirements.

Customised Diets

Every business is different, and sometimes you'll have specific results in mind that you're not quite getting from your existing diets.

If you're looking for that extra edge, Barastoc work with you to custom design a feed program specifically for your horses.

Commercial Feed Delivery

From commercial to boutique operations, we deliver your feed to suit your equine operation.

Barastoc have the capability to pack and deliver feed in multiple pack types and sizes to suit your operation.

- 20kg bags
- 500kg bulka bags
- 1 tonne bulka bags
- Bulk truck deliveries

Convenient, specialised and economical.

BREED N GROW

STEADY
GROWTH

IMMUNE SYSTEM
SUPPORT

BONE STRENGTH
& DEVELOPMENT

Barastoc Breed N Grow pellets are a fully fortified feed to support breeding horses and youngstock.

- Low starch formula to support a Low GI Diet that assists in reducing growth and development disorders.
- Fortified Vitamin and Mineral formula with added bioavailable silicon, to promote bone development and density, and assist in maintaining skeletal integrity.

Please consult Barastoc for detailed feeding rates and diet analysis.

The amount fed will vary according to the horse's condition and the quality of pasture and/or roughage available.

Barastoc Breed N Grow can be used to supplement grazing and/or high quality roughage to not more than one half of the horse's daily feed intake by weight.

LEGEND

HIGH NUTRITIONAL VALUE

REDUCED FEEDING RATE

HIGHLY DIGESTIBLE

An oat-free muesli concentrate to support broodmares, breeding stallions, weanlings and yearlings, Barastoc Legend has been developed as a versatile feed to provide all the minerals, vitamins and protein required for breeding and growing horses in a small daily amount.

- A concentrated, oat-free low starch muesli with the flexibility to add grain, allowing control of weight gain and body condition, without sacrificing mineral and protein nutrition.
- Contains natural Vitamin E, to provide antioxidants that support your horse’s immunity and to assist in reproduction.
- Formulated with yeast cultures to aid digestion and gut health.

Please consult Barastoc for detailed feeding rates and diet analysis.

The amount fed will vary according to the horse’s condition and the quality of pasture and/or roughage available.

Barastoc Legend can be used to supplement grazing and/or high quality roughage to not more than one half of the horse’s daily feed intake by weight.

LOW GI CUBE

REGULATES BLOOD SUGAR LEVELS

SLOW RELEASE ENERGY

BALANCED NUTRITION

A low-starch and low-glycaemic cube with slow-release energy for breeding, growing and performance horses. Barastoc Low GI Cube will provide your horses with the right balance of nutrients their bodies need, whilst minimising the risk of nutritional induced disorders such as developmental orthopaedic disease (DOD).

- Contains multiple super fibre sources and added omega rich oil to ensure a slow release of energy, which aids digestion and hindgut health.
- Contains KER Buffered Mineral Complex™ (BMC) for gastric and hind gut buffering which improves gut health. BMC and organic trace minerals have been shown to enhance bone mineralisation.
- The right balance of bio-available organic trace minerals and natural vitamin E for coat quality and maximum hoof wall growth.

Please consult Barastoc for detailed feeding rates and diet analysis.

The amount fed will vary according to the horse's condition and the quality of pasture and/or roughage available.

Barastoc Low GI Cube can be used to supplement grazing and/or high quality roughage to not more than one half of the horse's daily feed intake by weight.

World-Class Facilities

Barastoc, part of the Ridley Corporation is a proudly Australian-owned company, with three world-class horse-feed mills at key regional locations in Pakenham (VIC), Tamworth (NSW) and Toowoomba (QLD).

We have been part of the Australian equine industry for over 50 years, formulating and manufacturing quality horse feed for commercial operations nationwide. Quality and safety standards are applied to every part of our business, from the receipt of raw materials right through to the dispatch of finished products. This ensures a safe, high quality feed for your horses, and peace of mind for you.

Ridley mills support Australian farmers by sourcing local ingredients, and we employ over 700 people from local communities. We value our ability to give back, working with the Garvan Institute and

Aussie Helpers, as well as sponsoring events, organisations and individuals.

At Ridley, we operate according to strict quality and safety standards through a fully-integrated Quality Management System (QMS) that incorporates all aspects of Good Manufacturing Practices (GMP), food safety, and HACCP programs. All Ridley sites are FeedSafe® accredited by the Stock Feeds Manufacturers' Council of Australia. The Feedsafe® program has been developed with the Chief Veterinary Officers within each State, and has Primary Industries Ministerial Council endorsement.
