NUTRITION**

A low-glycaemic cube with slow-release energy for breeding, growing and performance horses.

WHAT WILL IT PROVIDE MY HORSE?

Formulated as a lower starch diet with multiple super fibre sources and added oils in a cube form, Barastoc Low GI provides a research-proven low glycaemic diet ensuring slow release, cool energy.

Perfectly balanced for performance and breeding horses intolerant to high grain diets, and young horses at risk of Developmental Orthopaedic Disease.

Contains KER Buffered Mineral Complex™ (BMC) for gastric buffering and to enhance bone mineralisation.

The recommendations provided are intended as a guide only. The amount fed will vary according to the horse's condition and the quality of pasture and/or roughage available. Barastoc Low GI Cube can be used to supplement grazing and/or high quality roughage to not more than one half of the horse's daily feed intake by weight. Introduce this feed gradually over a two week period. Intake less than the levels listed may require additional vitamin and mineral supplementation. For horses or ponies with an estimated weight substantially below or above 500kg please consult Barastoc for a more detailed feeding rate and diet analysis.
