Explosive Environments

Petrol stations and explosive atmospheres

In locations with potentially explosive atmospheres, obey all posted signs to turn off wireless devices such as your device or other radio equipment.

Areas with potentially explosive atmospheres include fuelling areas, below decks on boats, fuel or chemical transfer or storage facilities, areas where the air contains chemicals or particles, such as grain, dust, or metal powders.

Blasting Caps and Areas

Turn off your device when in a blasting area or in areas posted turn off “two-way radios” or “electronic devices” to avoid interfering with blasting operations.

Environmental Information

WEEE Approval

- Electric and electronic equipment must not be disposed of as municipal waste. The abusive disposal of waste from electrical and electronic equipment is punished with an administrative penalty.
- Hazardous substances contained in electrical and electronic equipment and their improper use may have adverse effects on the environment and human health, therefore a separate collection is required that is suitable for grouping waste into homogeneous product fractions in order to reduce its disposal.
- The barred garbage container on wheels as shown in the figure indicates the obligation of separate collection of electrical and electronic equipment and differentiation from other waste.
- Electrical and electronic equipment that has run out of service life must be handed over to municipal collection centres or may be delivered to the dealer when purchasing new equipment.
- Contact your Customer Services centre for further information how to dispose of or recycle your device in a safe and appropriate manner.

Reduction of hazardous Substances

This device and its electrical accessories comply with the regulations on the restriction and use of hazardous substances in electrical and electronic equipment. For REACH and RoHS compliance statements, please refer to <http://vodafone.com/vdf4960/ec-declaration>

Operational Area

This device can be used in all member states of the European Economic Area, restricted for indoor usage only. Approvals and notifications below are relevant to specific geographic regions.

Limitations in the 2.4 GHz Band

Norway: This section does not apply to the geographical area within a radius of 20 km from the Centre of Ny-Ålesund.

Limitations in the 5 GHz Band

According to article 10 (10) of Directive 2014/53/EU, the packaging shows that this radio equipment is subject to certain restrictions when it is used in the following countries: The 5150 to 5350 MHz frequency range is restricted to indoor use in:

Belgium (BE), Bulgaria (BG), Czech (CZ), Denmark (DK), Germany (DE), Estonia (EE), Ireland (IE), Greece (EL), Spain (ES), France (FR), Croatia (HR), Italy (IT), Cyprus (CY), Latvia (LV), Lithuania (LT), Luxembourg (LU), Hungary (HU), Malta (MT), Netherlands (NL), Austria (AT), Poland (PL), Portugal (PT), Romania (RO), Slovenia (SI), Slovakia (SK), Finland (FI), Sweden (SE), United Kingdom (Northern Ireland) (UK(NI)), Turkey (TR), Norway (NO), Switzerland (CH), Iceland (IS), Liechtenstein (LI).

In accordance with the relevant statutory requirements in the UK, the 5150 to 5350 MHz frequency range is restricted to indoor use in the United Kingdom.

Power and Frequency Bands:

(a) Frequency bands in which the radio equipment operates: Some bands may not be available in all countries or all areas. Please contact your local carrier for more details.

(b) Maximum radio-frequency power transmitted in the frequency bands in which the radio equipment operates: The maximum power for all bands is less than the highest limit value specified in the related harmonised standard.

The frequency bands and transmitting power (radiated and/or conducted) nominal limits applicable to this radio equipment are as follows:

- WiFi 2.4 GHz band: 20 dBm
- WiFi 5 GHz band:
5150-5350 MHz: 23 dBm
5470-5725 MHz: 30 dBm

Software

The product software version is 2.93.2.0 or later version.

Subsequent software updates may be released by the manufacturer to fix bugs and/or improve the capabilities of the product. Any subsequent software update released by the manufacturer will be verified and will maintain compliance with the relevant regulations.

All RF parameters (e.g. frequency range or maximum output power) that are subject to regulation are not accessible to the user.

The product contains Open Source Software. The list of open source modules, associated license information, and instructions for obtaining the source code (if authorised by the relevant license) are available at the following internet address: vodafone.com/vdf4960/opensource

Product Safety Information

Vodafone VDF4960

PLEASE READ THIS SAFETY INFORMATION BEFORE YOU USE THE DEVICE. FOLLOWING THE WARNINGS WILL HELP PREVENT INJURY TO YOURSELF OR OTHERS AND DAMAGE TO YOUR DEVICE.

ADDITIONAL SAFETY WARNINGS MAY BE GIVEN FOR THE OPERATION OF SPECIFIC APPS ON YOUR DEVICE, YOU SHOULD ALSO FOLLOW THESE INSTRUCTIONS.

Symbology and Warnings

Read the Safety Information of this manual before using this device. Failure to comply with safety warnings can result in serious injury.

Do not rely on this device for emergency communications.

Switch off in explosive environments.

Do not dispose of this device in a fire.

This device is not intended for use by young children. This device contains small parts which are a choking hazard.

Avoid contact with magnetic media.

Only use approved accessories.

Avoid Extreme Temperatures.

Keep away from pacemakers and other personal medical devices.

Avoid contact with liquid, keep dry.

Switch off when instructed in hospitals and medical facilities.

Do not try to disassemble.

Switch off when instructed in aircrafts and airports.

RF Exposure

Your device contains a radio transmitter and a receiver. When it is ON, it receives and transmits RF energy. Your device is designed not to exceed the limits for exposure to radio waves recommended by international guidelines. These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health.

To ensure compliance with RF exposure guidelines the device must be used with a minimum of 20 cm separation from the body. Failure to observe these instructions could result in RF exposure exceeding the relevant guideline limits.

Regulatory information

Hereby Vodafone declares that this device is in compliance with Directive 2014/53/EU. The full text of the EU Declaration of Conformity (DoC) is available at the following internet address: <http://vodafone.com/vdf4960/ec-declaration>

Product Handling

You alone are responsible for how you use your device and any consequences of its use. You must always switch off your device wherever its use is prohibited. Use of your device is subject to safety measures designed to protect users and their environment.

- Always treat your device and its accessories with care and keep it in a clean and dust-free place.
- Do not expose your device or its accessories to open flames or lit tobacco products.

- Do not expose your device or its accessories to liquid, moisture or high humidity.
- Do not drop, throw or try to bend your device or its accessories.
- Do not use harsh chemicals, cleaning solvents, or aerosols to clean the device or its accessories
- Disconnect all cables and accessories while cleaning.
- Do not paint your device or its accessories.
- Do not attempt to disassemble your device or its accessories, only authorised personnel must do so.
- Do not expose your device or its accessories to extreme temperatures, minimum 0 and maximum 40 degrees Celsius.
- Please check local regulations for disposal of electronic products.

Small Children.

Do not leave your device and its accessories within the reach of small children or allow them to play with it. They could hurt themselves or others, or may accidentally damage the device.

Your device contains small parts with sharp edges that may cause an injury or which could become detached and create a choking hazard.

Demagnetisation

To avoid the risk of demagnetisation, do not allow electronic devices or magnetic media close to your device for a long time.

Avoid other magnetic sources as these may cause the internal magnetometer or other sensors to malfunction and provide incorrect data.

Installation Conditions for Usage

This product is only suitable for indoor usage at a temperature not exceeding 40 degrees Celsius.

This product must not be installed or used in a location subject to direct sunlight or direct heat or excessive moisture.

This product must not be installed or used in areas with insufficient heat dissipation. Do not cover or block the ventilation slots of the device.

You must immediately switch off and disconnect the product from the mains supply and request assistance, if any of the following occurs:

- The product has come into contact with liquid substances.
- The product does not operate normally when you follow the instructions for use.
- The product has been damaged (for example falling).
- The product appears to be excessively hot.
- You see or smell smoke or burning from the product or accessories.
- The power cord or plug is damaged.

Emergency Calls

This device cannot guarantee connection in all conditions. Therefore, you must never rely solely on this device for emergency communications.

Device Heating

Your device may become warm during normal use, do not use this device if it is overheated (i.e. feels hot to touch).

Electrical Safety

Turn off your device and disconnect it from your personal computer in conditions exposed to atmospheric lightning.

Power adapter security

The power plug is designed to act as a disconnect device.

Make sure that the used electrical outlet is installed near the device and is easily accessible.

Accessories

Use only approved accessories and power adapter.

Do not connect with incompatible products or accessories.

Take care not to touch or allow metal objects, such as coins or key rings, to contact any electrical contacts on accessories.

Do not touch your device with wet hands. Doing so may cause an electric shock.

Do not touch the power cord with wet hands or disconnect the power supply by pulling the cord. Doing so may result in electrocution.

Faulty and Damaged Products

Do not use faulty or damaged devices or accessories.

Do not attempt to disassemble the device or its accessory.

Only qualified personnel should service or repair the device or its accessory.

If your device or its accessory has been submerged in water or other liquid, punctured, or subjected to a severe fall, do not use it until you have taken it to be checked at an authorised service centre.

Interference

Care must be taken when using the device in close proximity to personal medical devices, such as pacemakers and hearing aids.

Pacemakers

Pacemaker manufacturers recommend that a minimum separation of 20 cm be maintained between a device and a pacemaker to avoid potential interference with the pacemaker.

Medical Devices

Please consult your doctor and the device manufacturer to determine if operation of your device may interfere with the operation of your medical device.

Hospitals

Switch off your device when requested to do so in hospitals, clinics or health care facilities. These requests are designed to prevent possible interference with sensitive medical equipment.
