

PLEASE CAREFULLY READ THIS SAFETY INFORMATION BEFORE YOU INSTALL OR USE THE DEVICE. FOLLOWING THE WARNINGS WILL HELP PREVENT INJURY TO YOURSELF OR OTHERS AND DAMAGE TO YOUR DEVICE.

Symbology and Warnings

Read the following safety information. Failure to observe the safety warnings can result in serious injury.

Switch off the product in potentially explosive atmospheres.

This device is not intended for use by small children. If you allow a child to use it, make sure the child is closely supervised. This device contains small parts which are a choking hazard.

Use only approved accessories.

Keep away from pacemakers or other medical devices.

Turn off the product when required in medical-hospital settings.

Turn off the product when required in flight or at airports.

This appliance does not guarantee connection under all circumstances. Consequently, you should not rely solely on this device for emergency calls.

Do not throw in the fire.

Avoid contact with magnetic elements.

Avoid extreme temperatures.

Avoid contact with liquids, keep in dry environments.

Do not try to take the device apart.

Radio frequency (RF) exposure

Your device contains a transmitter and receiver. When turned on, it receives and transmits radio frequency energy.

Specific absorption rate (SAR)

The device is designed not to exceed the radio frequency exposure limits defined by international guidelines. These guidelines were developed by the independent scientific organization ICNIRP, and provide for safety margins that ensure the

protection of all individuals, regardless of their age and state of health.

The guidelines use a unit of measurement known as the specific absorption rate, or SAR. The highest SAR value for this device when tested complies with the specified SAR limit.

To ensure compliance with the recommendations on exposure to radio frequencies, the device must be used at a minimum distance of 20 cm from the body.

Failure to follow these instructions could result in RF exposure exceeding the reference limits and may use more power than necessary.

Regulatory Information

Vodafone declares that this device complies with Directive 2014/53 / EU. The full text of the EU Declaration of Conformity (DoC) is available on the following internet address: vodafone.com/rhg3006/ec-declaration.

Environmental information

The power consumption of the product in standby mode with only 5GHz activated is 6.56W.

This device can be used in all member states of the European Union, for internal use only. The following approvals and notifications are relevant to specific geographic regions, as described.

WEEE Approval

- The electrical and lithographic equipment must not be disposed of as urban waste, but there is a need for separate collection (collection suitable for grouping waste into homogeneous commodity fractions in order to reduce its disposal and prevent dangerous effects on the environment and human health).

- The symbol that indicates the separate collection of electrical and electronic equipment and differentiates it from other waste is a rubbish bin on wheels, crossed out, as shown in the figure indicated.

- The electrical and electronic equipment that has expired their operational life must be returned to the appropriate municipal collection centers, or they can be delivered to the retailer when purchasing new equipment, on a one-to-one basis - the retailer has the obligation to withdraw;

- Hazardous substances contained in electrical and electronic equipment, as well

as their improper use, can have negative effects on the environment and human health, so please follow the instructions for use and disposal;

- Illegal disposal of waste deriving from electrical and electronic equipment is punished with an administrative sanction.

Reduction of hazardous substances

This device and electrical accessories comply with local regulations on the restrictions and use of hazardous substances in electrical and electronic equipment (such as EU REACH, RoHS and battery regulation, if included, etc.) For declarations of conformity on REACH and RoHS, please visit our website vodafone.com/rhg3006/ec-declaration.

Limitations in the 5 GHz band:

Pursuant to Article 10 (10) of Directive 2014/53 / EU, it is indicated in the packaging that this radio equipment will be subject to certain restrictions when used in the following countries: Belgium (BE), Bulgaria (BG), Czech Republic (CZ), Denmark (DK), Germany (DE), Estonia (EE), Ireland (IE), Greece (EL), Spain (ES), France (FR), Croatia (HR), Italy (IT), Cyprus (CY), Latvia (LV),

Lithuania (LT), Luxembourg (LU), Hungary (HU), Malta (MT), Netherlands (NL), Austria (AT), Poland (PL), Portugal (PT), Romania (RO), Slovenia (SI), Slovakia (SK), Finland (FI), Sweden (SE), United Kingdom (UK), Turkey (TR), Norway (NO), Switzerland (CH), Iceland (IS), and Liechtenstein (LI).

The WLAN function of this device is limited to indoor use only when it operates in the frequency range between 5150 and 5350 MHz.

Power and frequency bands:

(a) Frequency bands in which radio equipment operates: Some bands may not be available in all countries or all areas. Contact the local operator for more details.

(b) Maximum power transmitted in the frequency bands in which the radio equipment operates: the maximum power for all bands is lower than the highest limit value specified in the relevant standard.

The nominal limits of frequency bands and transmit power (radiated and / or conducted) applicable to this radio equipment are as follows:

- Wi-Fi 2.4 GHz band: 20 dBm

- Wi-Fi 5 GHz band: 5180-5320 MHz, 23 dBm; 5500-5700 MHz, 30 dBm.

France: outdoor use limited to 10 mW EIRP within the 2454-2483.5MHz band.

Italy: in the 5150 - 5250 MHz frequency band, the maximum allowed isotropically radiated equivalent power (EIRP) is 200mW and its use is only allowed inside buildings.

Luxembourg: application for general authorization for the network and the provision of services.

Norway: This subsection does not apply for the geographical area within a radius of 20 km from the center of Ny-Ålesund.

Product treatment

The user is solely responsible for how the device is used and for any consequences deriving from it.

You must always turn off the device wherever the use of a wireless device is prohibited. The use of the device is subject to the safety rules established in order to protect users and the environment in which they operate.

- Always treat your device and its accessories with care and store it in a clean and dust-free place.

- Do not expose the device or its accessories to open flames or lit tobacco products.

- Do not expose the device or its accessories to liquids or high humidity.

- Do not drop, throw or attempt to bend the device or its accessories.

- Do not use harsh chemicals, cleaning solvents or aerosols to clean the device or its accessories. Disconnect all cables and accessories during cleaning.

- Do not paint the device or its accessories.

- Do not attempt to disassemble the device or its accessories: only authorized personnel can do this.

- Do not expose the device or its accessories to extreme temperatures, minimum +0 and maximum +50 degrees Celsius.

- Check local regulations for disposal of electronic products.

Children

Do not leave the device or its accessories within the reach of children and do not allow them to play with it.

They could harm themselves or others, or accidentally damage the device.

The device contains small parts with sharp edges that can cause injury, or detach and create a choking hazard.

Demagnetization

To avoid the risk of demagnetization, do not place electronic devices or magnetic media near the device for a long period of time.

Avoid other magnetic sources as they may cause the internal magnetometer or other sensors to malfunction and provide incorrect data.

Installation conditions for use

This product is only suitable for indoor use at a temperature not exceeding 40 degrees Celsius.

This product should not be installed or used in locations subject to direct sunlight or direct heat or excessive humidity.

This product should not be installed or used in areas with insufficient heat dissipation. Do not cover or block the ventilation slots of the device. You must immediately disconnect the product from the power supply and request assistance if any of the following situations occur:

- The product has come into contact with liquid substances.

- The product does not work normally when you follow the instructions for use.

- The product has been damaged (e.g. dropped).

- The product appears to be excessively hot.

- You see or smell smoke or flames from the product or accessories.

- The power cord or plug is damaged.

Emergency calls

This appliance does not guarantee connection under all circumstances. Consequently, you should not rely solely on this device for emergency calls.

Device overheating

The device may overheat during normal use, do not use this device if it is overheated (if it is hot to the touch).

Electrical safety

Accessories: Use only approved accessories. Do not connect them via incompatible products or accessories. Do not use defective and damaged products. Do not attempt to disassemble the device or its accessories. Only qualified personnel are authorized to carry out maintenance or repairs on the device and its accessories. If the device or its accessories have been submerged in water, punctured, or crashed violently, do not use them until they have been checked at an authorized service center.

Turn off the device and disconnect it from your computer in lightning-exposed weather conditions.

Power supply

The power plug has been designed to be removable. Make sure that the socket used for the power supply is close to the product and easily accessible.

Information on accessories and software

Use only approved accessories and power supplies.

Do not connect with incompatible products or accessories. Be careful not to touch or leave metal objects, such as coins or key rings, to contact any electrical contacts on accessories.

Do not touch the device with wet hands. Doing so could cause electric shock.

Do not touch the power cable with wet hands or disconnect the power by pulling the cable. Doing so can cause electrocution.

The product software version is 3.0.10 or later. Software updates will be published by the manufacturer to fix bugs and improve functionality after the product is marketed.

All subsequent versions of the software published by the manufacturer will be verified and compliant with the relevant regulations.

All RF parameters (such as frequency range or output power) that are subject to regulation are not accessible to the user, who cannot modify them.

The product contains Open Source software. The list of Open Source modules, related licensing information and instructions on how to obtain the source code (when authorized by the applicable license) are available on the Information page in the web interface of this device.

Defective and damaged products

Do not use defective or damaged devices or accessories.

Do not attempt to disassemble the device or its accessories.

The device and its accessories should only be repaired by qualified personnel.

If the device or its accessories have been submerged in water or other liquid, punctured or subjected to a strong fall, do

not use them until they have been checked by an authorized service center.

Interference on medical devices

Care must be taken when using the device in the vicinity of medical equipment for personal use such as pacemakers and hearing aids.

Pacemakers

Pacemaker manufacturers recommend leaving at least 20 cm of space between wireless devices and the pacemaker to avoid potential interference with the pacemaker.

Medical devices

Consult your physician and device manufacturer to determine if device operation could interfere with the operation of the medical device.

Hospitals

Do not use the wireless device in areas where it is required to turn off wireless devices in hospitals, clinics or healthcare facilities. These requests are intended to avoid possible

electromagnetic interference with the most sensitive medical equipment.

Explosive environments

Petrol stations and explosive atmospheres

In places with potentially explosive atmospheres, obey all posted signals to turn off wireless type devices such as the device or other radio equipment.

Do not use the device in areas with potentially explosive atmospheres, including fueling areas, decks under boats, transportation or storage of fuels or chemicals, areas where the air contains chemicals or particles such as grains, powders or metal powders.

Electric detonators and areas where explosives are used

Switch off the device when in a blasting area or in areas where „two-way radios“ or „electronic devices“ are prohibited to avoid interference with blasting operations.
