How Does BookMint Work?

The platform uses a straightforward three-step process to bring your digital assets to life.

- - **Step 1: Choose Your Project Type** Log into the dashboard and select the type of book you want to create. You can start from a completely blank canvas, import your own text documents, or use the automated templates for low-content or educational materials.
 - **Step 2: Generate and Customize** Input your target keywords to let the AI build out your content, or use the drag-and-drop elements to arrange your pages. If you are building worksheets or puzzle books, you can select your specific parameters and let the design generator place the elements automatically.
 - **Step 3: Export and Publish** Review your final layout using the built-in previewer. Once you are satisfied with the look, hit the export button to download your high-resolution, print-ready files.
