

Is Hidden Money Slipping Through the Cracks with Outdated Circuit Management?

Discover the true financial and operational risks of circuit mismanagement

As global networks expand, managing circuit contracts and invoices has become increasingly complex. Disconnected systems, manual validation, and inconsistent carrier billing often leads to unused circuits, duplicate charges, and cost leakage that go unnoticed.

It's time for a smarter strategy. Syniverse Universal Commerce for Circuits (UCC) unifies circuit inventory, contracts, and billing data into one intelligent, AI-powered platform.

Streamline operations. Strengthen accountability. Stop paying for what you don't use.

30% savings on **\$18M** annual spend

Revealed **77%** payment inefficiencies

Reduced overhead and payments team by **50%**

Bring Order to Chaos and Lower Costs

UCC delivers actionable business intelligence that empowers you to make confident, informed decisions, turning complexity into operational efficiency.

Centralize visibility

Get a unified and comprehensive view on active and inactive circuits across partners and contracts.

Complete circuit clarity/ lower cost

Validate and reconcile invoices

- Seamlessly integrate data from multiple sources to provide automated invoice validation against actual circuit usage.
- Reduce disputes, overpayments, and cost leakage.

Reduce overcharges/ lower cost

Enhance negotiation power

- Centralize orders and inventory to avoid redundant purchases.
- Negotiate more favorable terms.

Improve invoice accuracy

Streamline asset management

Store and manage all carrier agreements, contract terms, terminations, and pricing in one place for financial confidence.

Reduce circuit overruns

Optimize operational efficiency

- Automation tools eliminate error-prone, manual processes.
- Streamline service activations, troubleshooting, and audit readiness.
- Scales with your network.

Eliminate manual work through automation

Take control of circuit management to eliminate costly oversights!

The UCC platform delivers a comprehensive solution for managing circuits to save you money.

Why Syniverse

Syniverse UCC is powered by 35+ years of experience managing financial transactions at scale for the world's top telecom providers. Partnering with our customers to uncover cost optimization gives us unmatched capabilities in handling complex, high-volume financial contracts. And we're applying that expertise to transform how organizations manage the business side of circuit connectivity.

Syniverse delivers automation, transparency, and control across the full financial lifecycle.

Learn how you can take control, cut costs, and boost efficiency today with the UCC Platform.
