

PERSONALIZED VENDING SOLUTIONS

MSC offers a diverse lineup of vending machines that can be tailored to your wide-ranging needs. Scheduled and automated reorders reduce operational costs and optimize cash flow. Ongoing inventory optimization and monitoring help you keep up with demand changes and product obsolescence. You can further reduce receiving and labor costs with available restocking service.

Our Inventory Vending Solutions Offer

- Diversity of machine options
- New weighted units for fast transactions
- Tailored item & demand planning
- Intuitive interface for easy search by item or job
- Scheduled & automated electronic ordering
- Full reporting suite

Benefits Include

- Greater visibility of on-site inventory
- Reduction in consumption of high-use items
- Small footprint for closer point-of-use access
- Identification of consumption patterns & changes
- Lowered P2P costs from automated ordering
- 100% access to MSC Service Team's experience

And to limit interruption to your day-to-day business, **MSC can quickly install ControlPoint™ Vending Solutions according to your timeline.**

An MSC inventory specialist will evaluate your needs, recommend the right solution for your business and then help implement it. Contact us to discuss your business goals and how we can help serve them today.

CAROUSEL

This rotating drum-styled carousel vending machine offers extensive capacity with a minimal footprint. Flexible configuration options, including a removable divider option, for versatile item management. Control usage, increase accountability, gain traceability, and reduce waste. The carousel offers the ability to dispense as little as a pair of gloves, or as much as a package of batteries, at a time. All of MSC's vending options can work stand-alone or be connected with other units to provide a custom solution tailored to your specific needs.

*Does not fit through a standard size doorway.

Ideal for

Managing a large number of different items including cutting tools, gloves, glasses, batteries and other MRO items that are dispensed individually or small package quantities in a minimal space.

Features

- Provides up-to 468 secure locations
 - Single-item dispense
 - Multiple-quantity dispense
- Removable dividers allow for 3"-wide or 6"-wide compartments
- 24/7 secure access
- PC based control with easy-to-use touchscreen for advanced functionality
- Comprehensive reporting package available
- Easily expandable as a stand-alone or add-on unit

Specifications

Overall Dimensions

40.55"W x 40.55"D x 79.13"H (1040 lbs.)

Door Size

3"W x 3"H or 6"W x 3"H

Compartment Depth

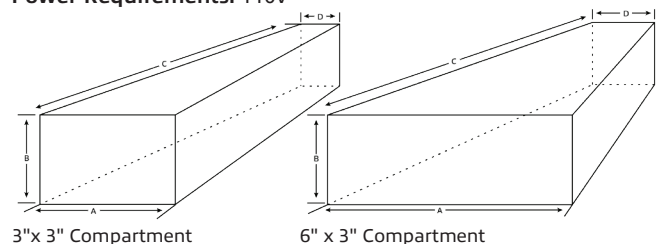

11.5"D and tapered inward toward the back of the compartment.

Compartment Dimensions

3" X 3" DOOR SIZE: 3.25"(A), 3.50"(B), 11.50"(C), 1.25"(D)

6" X 3" DOOR SIZE: 6/50"(A), 3.50"(B), 11.50"(C), 2.50"(D)

Power Requirements: 110v

WEIGHT-BASED LOCKER

Keep items secure and get fast dispensing with accurate counts thanks to precision weight-based scales. Available in configurations of between 9 and 27 secure locations, a weight-based locker can accommodate a range of items, including large or heavy items.

Best Uses to Maximize Value

- Consistent, high-usage items dispensed by the handful
- Categories like PPE, abrasives and welding supplies
- COVID-19-related items such as hand sanitizer and cleaning products

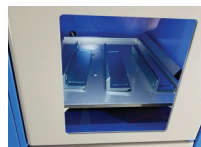

Features

- Available with 6, 12 or 18 weighing locations
- 24/7 access with multiple security options
- PC-based control with easy-to-use touchscreen for advanced functionality
- Easy to replenish
- Accurately and efficiently track small and large item consumption

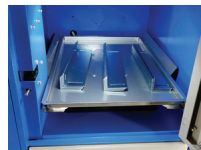

Stand-Alone or Add-On

Expandable with most MSC vending units while retaining a single point of control.

Locker Options

Small, medium and large locker compartments are available. Scales currently available in medium compartments only.

Specification

Standard Weighing Pad:

- Minimum individual item weight – 0.18 oz.
- Maximum total weight of all items in one compartment – 18 lbs.

Benefits

- Eliminates the need to count or repackage
- Creates faster transaction times: log in, select item, pick up, log out
- Eliminates the need to enter dispensed quantities
- Enables managing high volumes in a smaller footprint

Combined with our ControlPoint™ inventory management software, our weight-based locker gives you even more control over your essential inventory.

VISIBLE AND EFFICIENT

Each individual locker has LED lighting for visibility, and multiple locations can be opened in one transaction for efficiency.

VERSATILE AND ACCESSIBLE

Can be configured with between 9 and 27 secure locations in a single frame, and up to 10 frames can be connected and controlled from a single access point.

SECURE AND TRACEABLE

Lockers can require a combination of username, password, biometric identification or card readers, and our software helps you audit and track all item usage.

MANUAL OVERRIDE

If needed, you always have 24/7 availability to all the contents stored in your lockers.

LOCKER

This advanced locker unit provides secure organization with inventory visibility behind plexi glass doors and LED lighting. The locker unit provides accommodations for a range of items, including small, large, or heavy items. It is available in three configurations: all small lockers; all medium lockers; or, a combination of nine small, six medium and three large lockers.

Combined with our software, this unit provides the capability to track non-consumables such as valuable measuring instruments and power tools that can be charged in place. Our weighted lockers provide quick access to small items such as abrasives and welding tools with a grab and go experience without sacrificing traceability. All of MSC's vending options can work stand-alone or be connected with other units to provide a custom solution tailored to your specific needs.

Ideal for

Accommodating a range of products including PPE, large or heavy items, measuring instruments and power tools for traceability. Our weighted system can be added to manage smaller items, such as abrasive discs and welding tips, in large quantities for a grab and go experience.

Features

- Available with a weighted locker system for faster transaction times; only available with S2 and S4 models
- Each locker capable of holding up to 165 lbs.
- 24/7 secure access
- PC based control with easy-to-use touchscreen for advanced functionality
- Comprehensive reporting package available
- Easily expandable as a stand-alone or add-on unit

DRAWER

The Drawer unit provides unsurpassed floor space efficiency – up to 180 different SKUs can be independently managed in a 30" x 20" footprint.

This solution's multi-drawer, configurable design features progressively opening drawers, set up in pods that can be configured in a variety of formats for managing all item types. All while providing absolute security over your items. All of MSC's vending options can work stand-alone or be connected with other units to provide a custom solution tailored to your specific needs.

Ideal for

High value production needs, including carbide indexable inserts and round cutting tools, offering high storage capacity with minimal footprint: holds twice the number of SKUs in half the space of a coil machine.

Features

- Multi-drawer design:
 - Configures to your inventory
 - Progressive drawer technology opens a drawer just enough to dispense the needed quantity
- 24/7 secure access
- PC based control with easy-to-use touchscreen for advanced functionality
- Comprehensive reporting package available
- Easily expandable as a stand-alone or add-on unit

Specifications

Overall Dimensions

30.25"W x 20.5"D x 78.25"H (250 lbs.)

CABINET

This electronically controlled tool cabinet delivers versatile item management, handling a range of items from metalworking to MRO to measuring, and is available in multiple configurations. Lock down your consumables with customized compartments and gain traceability of your tooling. All drawers are full extension, with 440 lbs. weight capacity. All of MSC's vending options can work stand-alone or be connected with other units to provide a custom solution tailored to your specific needs.

Counter height cabinet shown in image above.

Ideal for

Managing a versatile range of lower cost non-production items including general purpose tooling and maintenance consumables.

Features

- Industry-standard cabinets
- Available in four different models to accommodate a wide range of product categories
- Dividers and partitions available for countless configurations
- 24/7 secure access
- PC based control with easy-to-use touchscreen for advanced functionality. Available for 10-drawer counter height model only.
- Comprehensive reporting package available
- Easily expandable as a stand-alone or add-on unit

Specifications

Overall Dimensions
