

# TAKE CONTROL

## With Intelligent MSC Inventory Management

### DISCOVER THE FUTURE OF INVENTORY MANAGEMENT

Gain visibility, flexibility and control to drive cost savings, productivity and profitability.

#### Unlock Unparalleled Value with ControlPoint® Crib

Every inventory management operation is unique. MSC can tailor ControlPoint Crib to address your specific needs, starting with a comprehensive assessment.

Organizations must account for a wide range of inventory with varying frequency, volume and velocity. The complexity to manage these indirect items increases when taking into consideration the eclectic mix of items needed for production, maintenance, repair and operations functional areas.

When ControlPoint Crib is implemented by MSC's team of inventory management experts, customers gain assistance in four critical operational areas:

- Storing Products in a manner that keeps items visible, accessible and orderly to enable timely fulfillment.
- Completing Tasks across a myriad of interrelated activities to ensure availability and facilitate material flow.
- Collecting Data on inventories, products and related transactions to provide basic visibility (what, where, when, who, etc.)
- Creating Intelligence by transforming data into information to explain behavior, enable decisions and foster improvements.

## WHY YOU NEED CONTROLPOINT CRIB

A tool crib is more than just a storage area – it's a vital source of information for production, maintenance and assembly personnel.

### ControlPoint Crib Offers:

- **Intuitive Interface:**  
Easy-to-use for quick adoption and utilization.
- **Real-time Inventory Tracking:**  
Accurate and up-to-date for more efficient decision-making and operations.
- **Automated Alerts and Purchase Orders:**  
Avoid stockouts with automated reporting and optimize purchasing with optional auto-ordering.
- **Purchase and Supplier Management:**  
Streamlined process for managing orders from MSC and customer-managed vendors.
- **At-a-Glance Visibility:**  
Quickly identify checked out items, alternate locations and tools awaiting rework.
- **Industry Agnostic:**  
Handle a wide variety of products without limitations.
- **Expandable:**  
Seamlessly integrates with ControlPoint Vending solutions.
- **Mobile Data Collection:**  
Convenient access to inventory data on MSC-provided mobile devices.
- **Barcode Scanning:**  
Simplifies data entry and improves accuracy.

Begin your ControlPoint Crib journey with MSC today and transform your inventory management from a lagging KPI to a leading one.

Our inventory management experts and customer support teams are committed to your success as we build your item plan, preconfigure your software, and install the hardware. Get up and running quickly – all with minimal disruption to your organization.
