

## ControlPoint In-Plant

# YOUR CUSTOMIZED & DEDICATED INVENTORY MANAGEMENT & PROCUREMENT TEAM

MSC's ControlPoint In-Plant solution helps you improve productivity and cut costs through customized procurement and inventory management solutions. Our solution includes a proactive approach to continuous improvement, transparent performance reporting, and seamless integration with all aspects of your operation.

### Dedicated Resources

- Procurement & Sourcing
- Product and supplier management
- Reduce TCO through spend under management
- Solution Services
- Optimized Purchasing
- Service & restock MSC vending, VMI & crib
- Storeroom Management
- Continuous Improvement Program through consistent optimization
- Greater Planning & Control
- Address obsolete inventory, and engage in 5S activities

### INTELLIGENT APPLICATION OF TECHNOLOGY FOCUSED ON YOUR SUCCESS

- Expertise across all aspects of manufacturing, procurement, inventory control, and cost reduction
- Combine with vending, VMI, and crib management for maximum value
- Insights and indicators identifying opportunities for improvement
- Consistent identification of gaps in inventory availability and supply chain

### LOWER YOUR COST TO MANAGE, TRANSACT, PROCURE, AND STORE MANAGED ITEMS.

Get started with a Business Needs Analysis (BNA). Our Customer Productivity Consultants (CPCs) conduct an unbiased process and data assessment of your indirect supply chain. With their expertise across all aspects of manufacturing, procurement, inventory control, and cost reduction, their BNA results in a customized solution proposal designed to drive productivity and profitability.
