

HOSE & COUPLINGS

QUALITY. VALUE. SOLUTIONS.

Hastings Deering

QUALITY

HASTINGS DEERING RANGE OF CATERPILLAR HOSE AND COUPLING PRODUCTS DELIVER THE ADVANTAGES YOU'VE BEEN SEARCHING FOR.

UNRIVALED EXPERTISE

We provide OEM genuine designs that meet the exact specification of your Cat® machines ensuring superior fluid retention and extreme flexing without fatigue.

METICULOUS MANUFACTURING

All replacement hydraulic hose assemblies are built to 'same-as-new' specifications for Cat equipment. This means hose assemblies are built to exact Caterpillar specifications to match the factory installed version it's replacing and can be manufactured from a part number alone – reducing downtime and improving your operating efficiencies.

UNMATCHED SUPPORT

Hastings Deering, backed by Cat, are uniquely skilled and equipped with superior Hose and Coupling parts, components and repair options to help you achieve maximum equipment productivity for the lowest possible cost.

RUGGED DESIGN

We provide a unique system approach with Hose and Couplings designed and tested to work together as a matched system. Our range of Cat Hose Assemblies are available in a broad line of high, medium and low-pressures and are designed to maximise performance and longevity.

- Cat hoses work at half the SAE bend radius while maintaining extreme flex capability and durability, which allows tighter routing in a wide variety of applications.
- Inner line and cushion stock made from high-quality rubber formulas proprietary to Caterpillar.
- Spiral or braided wire reinforcement for strength beyond industry standard.
- Tough outer cover built to resist abrasion, oil and weather and designed to meet the MSHA flame test requirements.

12 MONTH WARRANTY

Our Cat Hose Assemblies come with a 12 month warranty so you have peace of mind that quality is guaranteed.

VALUE

Hastings Deering Hose & Coupling Solutions are market competitively priced, yet carry the Cat quality and warranty associated with a premium product for peace of mind.

SOLUTIONS

When a hose failure occurs, we understand that you need the quickest and most reliable repair to reduce your machine downtime and get you back into production as soon as possible. We offer a range of solutions and replacement options, and are dedicated to providing the right level of service and advice to suit your needs.

BRANCH SOLUTIONS

Order by phone, online at parts.cat.com or in-store. We'll build an exact replacement hose to get your machine up and running as quickly as possible.

MOBILE SOLUTIONS

Our on-site call-out service is available for scheduled repairs and inspections and hose management 24/7.

DO-IT-MYSELF SOLUTIONS

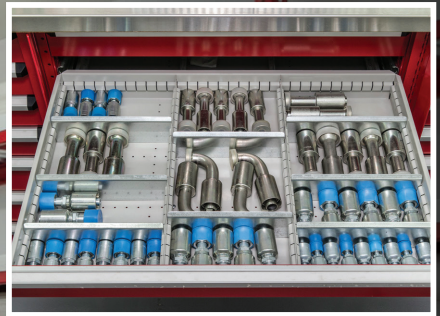

Make your own replacement hose assemblies using one of our tooling packages.

ON-SITE SOLUTIONS

Our on-site mobile hose assembly workshops are engineered to provide immediate response and ensure your productivity isn't compromised.

With a Hastings Deering Mobile Hose Assembly Workshop we can ensure we have the required inventory matched to your fleet on-site ensuring that hose replacement time is drastically reduced if and when a hose failure occurs. Our Mobile Workshops feature specialized Cat tooling and software designed to ensure the safe and reliable replacement of hose assemblies.
