EXHIBIT C
STATEMENT OF END USER NETWORK RESPONSIBILITY

IEDSS provides network based Public Address Systems (PAS) deployed on a wide variety of networks at end user facilities worldwide. As such, a primary factor, directly impacting the reliability of the PAS is a properly configured, reliable, stable network on which the PAS resides/functions.

IEDSS is not responsible, and thus, shall have no liability, for either (a) the end user's network requirements, including without limitation, those related to the overall performance, security, and other pertinent network criteria, or (b) the end user's facility network infrastructure, including without limitation, the hardware and/or software utilized for the network on which the PAS resides. IEDSS relies solely upon the end user's network owner/manager for the design, provision, configuration and maintenance of the network, in a manner that enables proper PAS function ability/functionality. If the network on which the PAS resides is improperly designed, configured or maintained, malfunctions or undergoes changes or modifications, then impacts to the reliability, functionality or stability of the PAS can be expected, resulting in PAS system anomalies that are outside the control of IEDSS. In such instances, IEDSS can be a resource to support the end user's network owner/manager in diagnosing the problems and attempting to restore the PAS to a fully functioning and reliable state. However, for network-related issues, IEDSS may look to the end user to recover costs associated with such support activities. For those end-users covered by either the prevailing IED OEM Limited Warranty and/or an IED Platinum Assurance Plan, and upon request by the end user, IEDSS will collaborate with all parties (IEDSS certified Integrators and/or end users) to provide limited assistance with network diagnostics at no additional cost to the end user. The extent and nature of this assistance will be based on the scenario encountered. Under these programs, IEDSS will solely determine when/if applicable charges for technical support will be applied. Out of warranty end users, and/or those not covered by a Platinum Assurance Plan will be assisted as technical support is available and applicable charges for that technical support will be applied.

IEDSS will not be liable for any consequences or damages, whether actual, direct, indirect, exemplary, special, consequential, or otherwise, for any end user network upon which a PAS resides/functions that is not properly configured, reliable, and/or stable. -

EXHIBIT D
STATEMENT OF RESPONSIBILITY REGARDING WINDOWS® OS
UPDATES

The Windows® operating systems on AtlasIED 1100/1200ACS and IP100 Series products are updated at the time of initial installation of the AtlasIED software with the latest AtlasIED approved Windows® updates prior to shipment. The Windows® operating system on 1151 and 1152 server based systems are updated at the time of initial installation of the AtlasIED software with the latest, pertinent Windows® updates available at the time of the initial software installation.

In either case, once the initial installation of AtlasIED software and Windows® updates are complete, Windows® updates are then turned off. Additionally, AtlasIED does not recommend automatic installation of future Windows® updates as this could adversely affect system function or cause system restarts on its own. AtlasIED will semi-annually, or on any special as-needed basis, review security updates for Windows Embedded for our IP100 series products and release update packages suitable for off-line installation. Other versions of Windows, such as Windows Server, running on other hardware platforms such as Dell servers can be updated if desired from standard Microsoft internet resources. If the owner of AtlasIED system(s) elects to install additional Windows® updates, that owner is responsible for all installation and testing of said updates. In the event that such update(s) cause system functional abnormalities, AtlasIED can provide technical advice and assistance.

AtlasIED will solely determine when/if applicable charges for technical advice and assistance will be applied. Out of warranty end users, and/or those not covered by a Platinum Assurance Plan, will be assisted as technical support is available and applicable charges for that technical support will be applied.
