

ARFF Fire Drill Safety Tips

1. Find the nearest exit and leave the building quickly and safely.
2. If you discover a fire, activate the building's fire alarm system immediately.
3. Stay calm. Follow the exit signs and evacuate without delay.
4. Do not use elevators during a fire. Use the stairs instead.
5. Close doors behind you when possible (don't lock them). This helps slow the spread of smoke and fire.

QUICK REFERENCE

Fire Alarm/Pull Station Location

Assembly/Muster Area

Assembly/Muster Area Coordinator

Emergency Phone Number

IF YOU HEAR THE FIRE ALARM

- Know your exit routes in advance
- Stop what you're doing
- Evacuate immediately

AFTER YOU EXIT

- Watch for responding emergency vehicles
- Report to your assigned assembly/muster area
- Check in with your supervisor or muster area coordinator

DURING EVACUATION

- Stay calm, move quickly, and don't run
- Stay low if you encounter smoke
- Before opening a door, check for heat using the back of your hand
- Do not re-enter the building until responders declare it safe

ADDITIONAL SAFETY REMINDERS

- Know your nearest exit based on your work area
- Review your department's emergency procedures regularly
- Do not block roadways—emergency vehicles need a clear path

DURING A FIRE EMERGENCY: STAY C.L.E.A.R.

C – Caution others

L – Look for an exit

E – Exit safely

A – Assemble at the assigned meeting area

R – Return only when emergency responders give approval
