

The Last Frontier State | Lesson Plan

What are the unique facts and features about the state of Alaska?

Students will understand Alaska's geography, unique characteristics, and historical significance.

Learning Objectives:

- Identify and locate the state of Alaska on a map, understanding its geographical positioning among the 50 states.
- Know the abbreviation for the state of Alaska and be able to spell its name.
- Describe nine unique characteristics of Alaska, including aspects of its history, climate, and cultural significance.

Key Vocabulary:

- **Caribou:** A large North American reindeer found in the tundra and boreal forests.
- **Crude oil:** A natural, unrefined oil found underground. It is extracted by drilling and is used to make products like gasoline and diesel.
- **Frontier:** A border or edge of a country or settled area where the known and inhabited region meets the unknown or unexplored land.
- **Glacier:** A large, slow-moving mass of ice formed from compacted layers of snow. Glaciers flow over land due to gravity and can shape the landscape by eroding rocks and depositing sediment.
- **Bering Strait:** A narrow passage of water that separates the easternmost point of Asia (Russia) from the westernmost point of North America (Alaska). It connects the Arctic Ocean with the Bering Sea and is about 55 miles (88 kilometers) wide. The Bering Strait is significant for its historical role as a land bridge during the Ice Ages, allowing human and animal migrations between Asia and North America.
