Bryce W. Eddy

Entrepreneur, Martial Artist

At our first PragerU Summit, my wife and I listened with tearful eyes to testimony after testimony from students who had rejected their parents, rejected Judeo-Christian values, and had been indoctrinated by their universities' divisive, secular religion of anger, hate and envy.

But their lives began turning around once they discovered PragerU's 5-minute videos, which explained the time-tested ideas and principles that established the greatest, most diverse, most free, least racist country that has ever existed – The United States of America.

These kids described journeys of personal growth that led back to faith, reconciliation with their families, and the pursuit of true happiness.

I have no doubt that PragerU is one of the most powerful organizations on earth, and my wife and I are proud to have our legacies knit together.
