

## ATTRACTIVE STORAGE SPACE MIRACLE: A KITCHEN COMPRISING ROOM-SHAPING, HIGHLY FUNCTIONAL UNIT ELEMENTS IN ULTRA-MATT FENIX QUALITY

Floor-to-ceiling fronts, the finest joints, optimal use of space: this kitchen concept is based on actively integrating the walls in the planning. A sense of visual closure and maximum storage space are the result of this holistic solution implementing unit elements optically and functionally as a new interior design planning option. Well-thought-out from floor to ceiling, the resulting spacious areas look tidy and elegant – the combination of dark, fine-grained elm wood and the ultra-matt, light grey surface of the new F 45 range underscores the top-quality, luxurious atmosphere of this kitchen

### **Concealed functionality and elegant ambience: LEICHT cuts a convincing figure with the very best in craftsmanship and planning expertise**

In this kitchen scenario, floor-to-ceiling sliding doors made of elegant elm wood veneer clad the area over the sink and preparation area where all important utensils are immediately accessible. When closed, the spacious area exudes elegance and top quality. The adjacent wall at right angles is also completely integrated in units, reflecting the characteristically two-dimensional look of this concept which, at the same time, highlights the effect of the materials used. The interplay of the new ultra-matt FENIX surface in light grey and the warm wooden look of the elm wood create an elegant and homely atmosphere in the form of floor-to-ceiling fronts and cladding.

This overall impression and the fine, graphic appearance of the kitchen are underlined by the filigree contour of the edge of the new programme F 45, chamfered at a 45° angle. Open, illuminated shelving units, which are rhythmically integrated in the floor-to-ceiling unit concept, break up the planning and offer space for personal highlights. The storage space elements are variable in depth and are arranged in a symmetric sequence with joints pairing up with the floor units – this holistically planned kitchen area presents itself as a true miracle of storage space with a discerning architectural and aesthetic character.
