

HOW CAN YOU HELP PEOPLE AFFECTED BY THE DROUGHT?

DONATE \$\$\$

Donating cash to a registered charity is one of the best ways to help.

Check out GIVIT's Drought Relief Appeal, where 100% of the money goes to affected communities.

And by donating money, rather than things like food hampers or bales of hay, you're ensuring that the money is invested back in local communities.

HOLD A FUNDRAISER

If you're feeling inspired and want to get other people in your community involved, you could organise your very own fundraising event. There are the good ol' faithfuls like cake stalls, sausage sizzles and fun runs. You could also try to brainstorm something more creative with a bunch of mates.

SAY G'DAY

If you've got family or friends living in the country, give them a call to let them know you're thinking of them. Feeling supported and connected can make a big difference when times are tough.

VOLUNTEER YOUR TIME

Volunteering is a great way to help out, learn more about people's experiences and lift community spirit. Sign up to the Farm Army to link up with farmers who need an extra pair of hands.

TAKE A COUNTRY VACAY

The drought has taken a big toll on our country towns, with less money pumping through local shops, restaurants, pubs and cafes. That's where you come in. Plan your next weekend getaway in a country town so that your holiday splurges help a good cause.

ReachOut.com is here for whatever life throws at you.
