

Founder & CEO, SHAPE Global
Keynote Speaker

Ali Khan

Ali in a Snapshot

25+ years of global consulting experience in health diagnostics, data & tech through consulting business; ARK Re

9 years of innovation leadership at AXA Wellbeing as CTO & Chief Science Innovation Officer

Contributor to multiple academic groups. Member of Harvard University Human Flourishing Program – Flourishing at Work Interest Group.

Ali helps organisations **flourish** by unlocking the value their biggest assets bring; their people.

At SHAPE he focuses on delivering measurably high performance through a flourishing mindset for businesses and their employees.

What Ali does

Ali supports executive teams and practitioners globally to harness better performance at work through measuring driving flourishing.

He is a product engineer at heart, combining multiple disciplines and experiences to design solutions to overcome complex issues.

Ali loves building high performing teams across borders, in cultures that facilitate outperformance.

Entrepreneur, Collaborator, Advisor

Working with corporates and start-ups, Ali actively consults on special projects in the fields of advanced innovation and deep-tech in health and human performance.

Keynotes

With 15+ years of delivering and moderating keynote experiences, workshops and seminars, Ali talks about the 'F' word. Onstage he both entertains and educates audiences using the power of science and statistical storytelling, Ali's memorable keynotes reveal the incredible secrets and value of flourishing.

Interesting...

Ali has worked extensively in 4 key industries - banking, telecoms, health and now HR - at the forefront of innovations we now take for granted; Bluetooth, broadband, chronic and infectious disease management, and now flourishing.
