Gary once said,

“ 99% of life’s decisions  
are made from feelings. ”

By living in the past and dwelling on the future you stop focusing on the present. With Present Time, you can create the best version of yourself as you go beyond the past, move forward, and live in the moment.

Apply on the wrists and behind the ears to open the mind for new possibilities.

Set the right intention through words of self-affirmation, “*I am present in this moment and I am grateful for the experience.*”

Keep focused on your task by adding 3 drops in the palm of your hand and breathing in Present Time’s empowering aroma.
