leader in concrete fencing,
sound barriers and
retaining walls.**

Durable • Elegant • Versatile

Superior Concrete Rail™

Durability, elegance,
and versatility... It all
adds up beautifully, to
many years of value.

Property owners have traditionally relied on rail fencing to protect everything from livestock and horses to valuable equipment. Superior Rail™ builds on that versatility with the superior strength and the value of precast concrete. Superior Rail™ has a rich, natural-looking wood texture without the fast deterioration & aging of real wood from the elements, termites, or fire. Since it's made of durable, steel-reinforced precast concrete, you get decades of maintenance free enjoyment. Whether for a barn, animal enclosure, or boundary, Superior Rail™ adds enduring aesthetic value to any property. Concrete never looked so good.

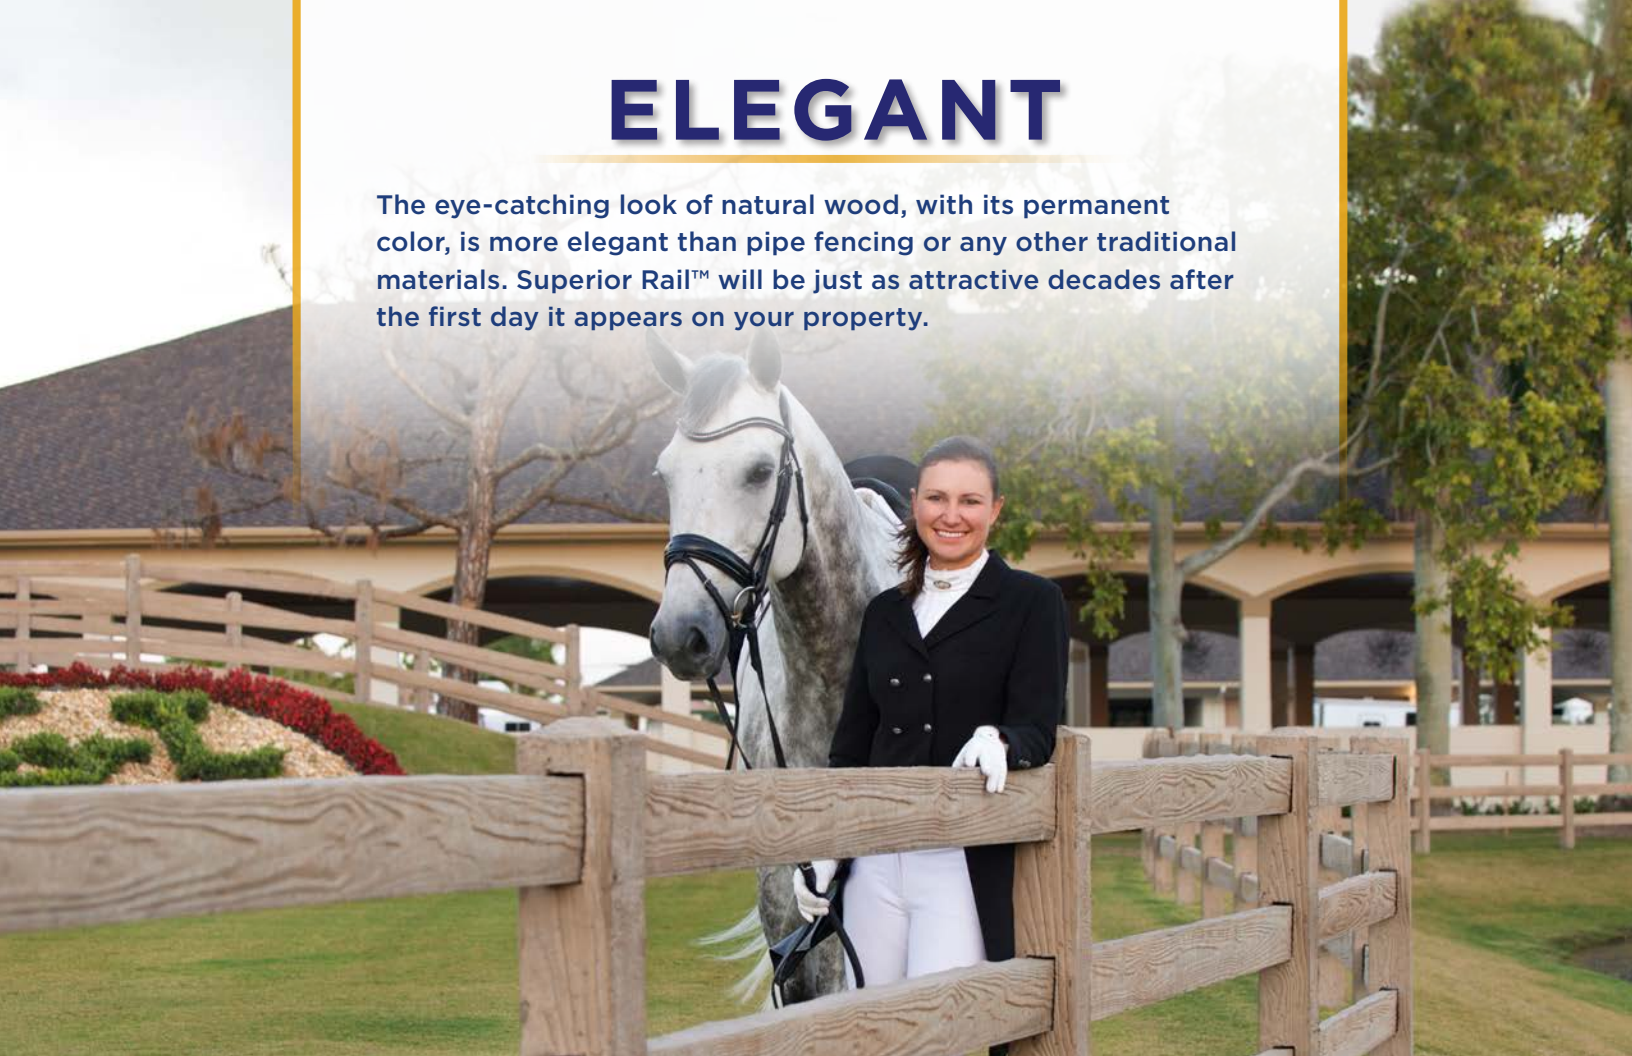

DURABLE

Superior Rail™ is a unique and reliable precast concrete reinforced post and rail system. Manufactured with a choice of 12 integral colors, steel bars in the posts and rails, plus fiber reinforced high strength concrete. It all adds up to a superior, secure enclosure that outlasts traditional wood and wire, plastic or metal pipe fencing. Our Superior Concrete Rail fencing is impervious to insects, it weathers well and won't allow livestock to push beyond its limits.

ELEGANT

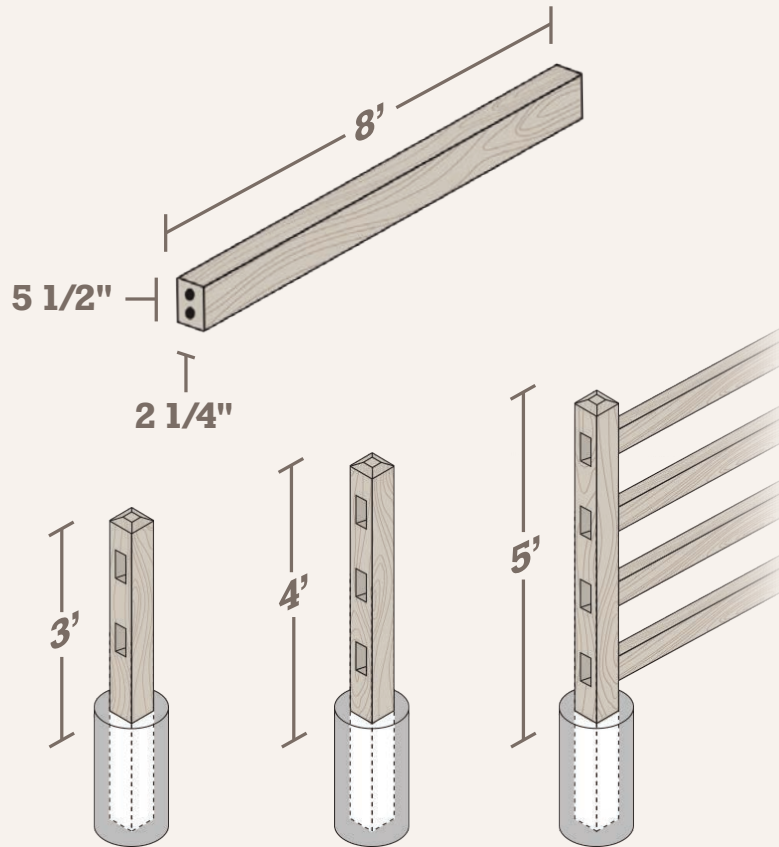

The eye-catching look of natural wood, with its permanent color, is more elegant than pipe fencing or any other traditional materials. Superior Rail™ will be just as attractive decades after the first day it appears on your property.

VERSATILE

Superior Concrete Rail™ offers the perfect range of heights for border trails, driveway entrances, estates, golf courses & parks, or dividing one section of land from another. Our engineers can help you plan for a variety of terrains while our wide range of colors blend beautifully and naturally with the land.

SPECIFICATIONS

- Wood texture on both sides with integral color
- The post is embedded into the concrete footing/pier
- Concrete posts are spaced at 8' on center
- 3' to 5' from grade to top of post for 2, 3 or 4 rail
- Posts & rails are reinforced with steel rebar for longevity and durability
- 2 RAIL (3FT HIGH) Ideal for many borders, drives or divisions
- 3 RAIL (4 FT HIGH) Provides a safe and secure surrounding for horses, livestock and cattle.
- 4 RAIL (5 FT. HIGH) Lends extra security and prominence to large estates and ranches.
