

The design and build leader in concrete fencing,
sound barriers and retaining walls.

ABOUT SUPERIOR CONCRETE PRODUCTS

Since 1986, Superior Concrete Products has been a premier, full-service manufacturing and construction company that provides a complete range of NPCA certified precast concrete building systems.

We manufacture and install screening walls, perimeter fences, retaining walls, sound barriers, highway walls, and more. Each product has the rich look and feel of stone, brick, stucco or wood, with a level of reliability and durability traditional materials can't match.

Our building systems are used in a wide variety of applications, nationwide and around the world.

We can serve your needs anywhere.

SYDNEY'S SHELTER

When 18-year-old Sydney told her dad, Todd Sternfeld, the CEO and owner of North Texas-based Superior Concrete Products, about an idea for starting a new educational program for her school that would help abandoned pets, he leapt at the opportunity to help. Located in southern Utah, Diamond Ranch Academy uses horses and farm animals to help struggling teens, and Todd's daughter wanted to create a program that would give students an opportunity to work with homeless dogs, cats and other small pets. Superior Concrete Products donated precast concrete materials for building a new 2,000 sq. ft. facility and fenced enclosure that proudly opened its doors as Sydney's Shelter in 2015.

Superior Stucco™

Superior Stucco offers the rich textured look and feel of a stucco wall, with all of the strength and reliability of a precast concrete fence. This product has architectural detail that will enhance the look of any project, and can be installed with standard caps or upgraded with elegant bullnose caps.

Superior Stone™

Our series of Superior Stone products includes Cobblestone, Ledgerstone, and Stone Columns, all of which are nearly indistinguishable from traditional hand-laid stone masonry. Whether your project requires the old world style of cobblestone or the sturdy look of stacked stone or the striking appeal of stone columns, the results will add an appealing, enduring value to your property.

Superior Brick™

Fences and walls made from modular Superior Brick panels are more versatile than traditional brick masonry and can be installed in a fraction of the time. Unlike bricks and mortar, our product is engineered to withstand shifting terrains and extreme temperatures. For long-term reliability, this is especially important in areas like Texas that experience severe and fluctuating weather conditions.

Superior Fence™ & Superior Board-on-Board™

Superior Fence and Superior Board-on-Board are amazing screening walls, adding value and appeal around any property for a lifetime. Superior Fence and Superior Board-on-Board feature the look and feel of traditional cedar in maintenance-free precast concrete, ideal for home or commercial use.

Unique Benefits

- Cedar texture on both sides of the panels
- Panels stack horizontally or vertically
- Posts are set 7'-6" to 7'-9" on center
- Heights up to 10' available

Superior Rail™

Superior Rail is a unique and reliable rail fence system. This fence's beautiful design will enhance your surroundings, while maintaining its natural-looking wood texture for decades to come.

Unique Benefits

- Wood texture on both sides with integral color
- The post is embedded into the concrete footing / pier
- Concrete piers are spaced at 8' - 0" on center
- 3' to 5' from grade to top of post for 2, 3 or 4 rail
- Rails are reinforced with steel rebar for longevity and durability

Horizontal Panel Installation

Vertical Panel Installation

PRECAST FENCE INSTALLATION

Cost-Effective

Superior Concrete Products offers the most cost-effective alternative to stone, brick or wood fences that won't rot, rust or easily burn. No other fence or wall provides so many lasting benefits for the cost.

Design Engineering

Superior Concrete Products provides design engineering services for every job. The color, strength, texture and size of each wall system can be custom designed. Soil testing and evaluation, fence design, and architectural consulting services are available.

Fast, Turnkey Installation

Superior Concrete Products provides complete turnkey service from engineering, permitting and manufacturing of materials to shipping and installation. The Superior Concrete Products manufacturing plant is certified by the National Precast Concrete Association (NPCA).

Technical Information

- Integrated color and concrete are thoroughly mixed and vibrated, and will retain a strength of 5,000 PSI at 28 days
- Steel-reinforced posts, panels, and rails. Rebar conforms to ASTM A615, grade 60
- Wall posts are set 5' - 0" or 7'-6" to 7'-9" on center
- Post footing depth varies with local codes, soil conditions, wind load, and fence height
- Foundations: Site specific geo-technical information is used for each design
- Fences can be built from 1' to 30' in height
