

# Mission Statement Environment

## go TO zero

For all our products and mobility solutions we aspire to minimize environmental impacts along the entire lifecycle – from raw material extraction until end-of-life - in order to keep ecosystems intact and to create positive impacts on society.

Compliance with environmental regulations, standards and voluntary commitments is a basic prerequisite of our actions.

Focus on 4 prioritized action areas:

### Climate change

We are committed to the Paris Climate Agreement. We intend to become a **carbon neutral company by 2050**.

By 2025, we plan to **reduce our total life cycle Greenhouse Gas Emissions** of passenger cars and light duty vehicles **by 30%** compared to 2015. We actively contribute to the transition towards renewable energies along the entire life cycle.

### Resources

We intend to maximize resource efficiency and promote circular economy approaches in the areas of materials, energy, water and land use.

By 2025, we plan to **have reduced the production-related environmental externalities** (CO<sub>2</sub>, energy, water, waste, volatile organic compounds) **by 45%** per vehicle compared to 2010.

### Air quality

We are driving e-mobility forward to improve the local air quality.

By 2025, the **share of battery electric vehicles** in our model portfolio will be between **20 and 25%**. The share of electric vehicles in the Group fleet is to rise to at least **40%** by 2030.

### Environmental compliance

We aim to become a **role model** for a modern, transparent and successful enterprise in terms of **integrity** by installing and controlling **effective management systems covering the environmental impacts** of our mobility solutions over all life cycle stages.
