

Bond Warranty

Mannington recommends and warrants Mannington M-Grip™ adhesive for the installation of approved flooring products. Mannington M-Grip™ is recommended and warranted for applications with high moisture RH and MVER over new concrete substrates with intact under-slab vapor retarders. This warranty is for a period equal to the warranty life of the approved flooring being installed and covers installations in residential and light commercial applications.

Mannington M-Grip™ is a high moisture tolerance adhesive capable of withstanding concrete substrate moisture up to 10 lbs. per ASTM F 1869 or 95% RH per ASTM F 2170 with pH ranges up to 12. Mannington M-Grip™ is a high moisture tolerance adhesive not a moisture barrier and will not protect the flooring from moisture damage. The installation must be performed following Mannington's guidelines. Please visit Mannington.com/MGrip for the latest product information and application instructions.

If an installation failure occurs as a direct result of the use of defective adhesive, Mannington will pay for equivalent floor covering and adhesive materials and for reasonable labor costs to repair or replace the failed portion of the installation as determined by Mannington at its sole discretion. This warranty applies only to the adhesive related bond failures. However, Mannington cannot warrant those variables over which our company has no control. Factors such as the quantity of the adhesive used, the workmanship of the installer, the condition of the substrate, the stability of the flooring product or its suitability for the installation on the particular job, excessive moisture or alkalinity, or any other conditions that might affect the installation.

Mannington reserves the right to inspect the cause for any claim as deemed necessary or this warranty is null & void. Any repairs done prior to inspection voids any warranty. This warranty is non-transferable.

Sincerely,

Jason Hyson
