

FLEXIBLE SAMPLE PROGRAM

The new flexible custom sample process is able to be a much faster process because the base 24"x24" samples are already on the shelf and ready to be cut to any size you need from 24"x24" to 12"x16".

What is the cost per sample?

The cost per sample is the same regardless of what size the sample is cut to, including if it stays 24"x24".

Hardwood	\$45 per sample
LVT (ADURA®, REALTA®)	\$32 per sample
Sheet	\$32 per sample
Restoration Collection®	\$28 per sample

Can I request a special backer, rounded corners, or handles to these samples?

No, the only change we can make to the flexible samples is to the sample length and width.

How do I place an order for the new flexible custom samples?

Use the attached order form. Fill out the length and width of the finished sample you need. Send the completed order form to directsamples@mannington.com.

What if the sample I need to order isn't on the flexible custom sample list?

Use our current custom sample program for any SKUs not included in the flexible program.

Do I need to fill out a form to place the flexible or traditional custom sample orders?

Yes, a form must be filled out for every flexible or traditional custom sample order. We rely on the forms to ensure the order is delivered exactly as expected.

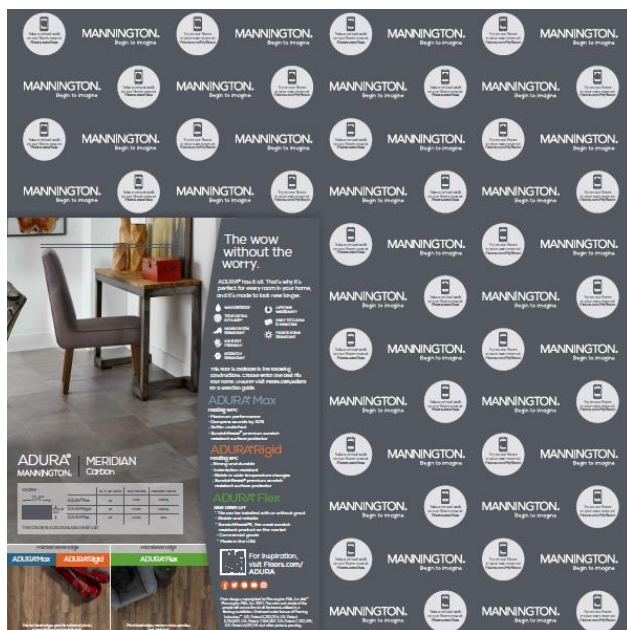

What products are included in the flexible custom sample program?

A selection of the most requested SKUs based on feedback from the sales team. See the lists on the next few pages for the specific SKUs.

When will this new program launch?

Samples are available now.

Example of a Backer:

The sample backer covers the entire area of the back of the 24"x24" sample with a "step and repeat" branding message to use our visualization tools. The key content, like room scene, icons, specs, product story, is contained in a 12"x16" area of the sample.
