**Mannington Mills, Inc. (“Mannington”) Declaration of Conformity
to Intentionally Added Per- and Polyfluoroalkyl Substance (“PFAS”)**

As a socially responsible manufacturer, Mannington is committed to delivering high-quality flooring products that are safe for people and the environment. As part of our product development process, we prioritize transparency and disclosure, carefully assessing materials, ingredients, and residuals at or below the legislatively prescribed thresholds in order to meet high standards for safety and environmental responsibility. To that end, Mannington implemented an annual value chain chemical management program designed to address a range of potential environmental implications of various chemicals, including poly- and perfluoroalkyl substances (PFAS). This proactive approach has enabled us to respond effectively to the issue of PFAS by assessing and tracking the absence of these substances within our products. As a result of our diligence, Mannington began eliminating PFAS chemicals from its product formulations in 2017 and completed the process in 2019. Accordingly, Mannington hereby declares that its flooring products and all raw materials and ingredients of which they are comprised do not contain any intentionally added PFAS chemicals.

In order to maintain PFAS-free status for our products, Mannington’s compliance team monitors regulatory updates to ensure that our flooring products continue to comply with ongoing legislative efforts in PFAS. Additionally, Mannington has adopted a Supplier Code of Conduct which outlines the standards and requirements that we expect our suppliers to meet in order to ensure that PFAS are not used in our products.

Please contact us if you have any further questions about our program. For more information on Mannington’s product formulations, visit our [Transparency](#) page.
