

Mannington ADURA® OneNose™ Step Nosing

Description

Mannington ADURA® OneNose™ Step Nosing is a finish molding for ADURA® that can be used on staircases, open railing, and sunken rooms.

Features

- Size: 3.25"W x 1.6"H x 94"L
- This product can be adapted for both flush and overlap installations
- Made in the USA

Overall Length: 94"

Installation Instructions

Follow Mannington's guidelines for layout, design and any special precautions for installation.

1. Carefully measure. Cut as needed. Utilize enclosed shims as necessary
2. Apply Mannington TripleStick™ adhesive inside the curve and flat spot of the step nosing
3. Roll the step nose in place. Once the transition is in place, press down firmly over the entire molding, making certain the transition is tight against the existing nosing and substrate. Let the adhesive cure according to directions

Shims for Flush or Overlap Installations

- 2.5mm: Shims not necessary. Overlap installation only
- 4-6mm: No shims for flush and one shim for overlap installation
- 8mm: Two shims for flush and three shims for overlap installation
- Use MSS-20 with applicator bottle or M-Weld to quickly bond shims
- Glue OneNose™ to substrate with Triple Stick™ adhesive
- Allow a minimum of 24 hours cure time before foot traffic

Color Codes/Packaging

- Color codes will vary
- 5 pieces per carton
