

Mannington SimpleStairs™ TopStep Nosing

Mannington technical team has developed a special TopStep Nosing to support our SimpleStairs™ installation. This step nosing is an over existing nose install. If there is no existing nosing, our MDF nose filler piece can be adhered to an existing step/landing. Our new molding will give your stairs a complete look that matches our SimpleStairs™ treads. Our TopStep Nosing is designed to allow floating floors to float freely. Note: SimpleStairs™ TopStep Nosing has an underslung that should be top set per instructions below. SimpleStairs™ TopStep Nosing packaging includes three plastic shims. SimpleStairs TopStep™ Nosing can be used with all Foundations SPC products. You will need available MSS-20 seam sealer and a tubes of Mannington Triple Stick adhesive.

1. Prepare existing top nose, remove any flooring, nails, staples etc.
2. Check that exiting nose is secure to landing, add screws if needed
3. Installed floating floor should allow a ¼ inch expansion to new nose underslung
4. Measure and cut SimpleStairs™ TopStep Nosing to fit over existing nose
5. Use a generous amount of MSS-20 seam sealer install proper shim to step nose
6. Apply a generous bead of Mannington Triple Stick adhesive to the nose top curve
7. Apply a bead on the subfloor or Step Nose flat area to adhere to landing or existing step
8. Be certain that SimpleStairs TopStep nosing is level
9. Once glued and leveled SimpleStep™ TopStep Nosing can be weighted and or pre-drilled/hand nailed
We find its best to drill a counter sink to avoid any blemish. Fill hole with a matching filler
10. Avoid traffic for 8 hrs. to allow adhesive to set, normal traffic after 24hrs.

Recommended tools/sundries

Chop saw/fine carbide blade

Drill & Drill bits or weights

Matching filler

MSS-20 seam sealer

Mannington Triple Stick

If needed (MDF Nose filler piece 1"x47" pre-drill and nail/glue with Triple Stick)

Provided Shim use (Use MSS 20 seam sealer to adhere shim to nose as needed)

2.5 mm -no shim

4.5 mm -1 shim

5.5 mm -2 shims

8 mm -3 shims
