

# PACAYA MESQUITE

## Unique Story You'll Want to Share

Pacaya Mesquite is known for its unique beauty and durability. The wood is harvested from trees that have been naturally distressed by the process of sap harvesting. Over time, the trees develop a distinctive pattern of cracks and knots from the sap harvesting, which gives the wood its character. Once a Pacaya Mesquite tree has stopped producing sap, it is used to create this truly unique floor.

## As Strong as it is Beautiful

The wood is also very strong and hard, making it resistant to wear and tear. As a result, Pacaya Mesquite is a perfect choice for use in high-traffic areas of your home. In addition to its beauty and durability, Pacaya Mesquite is also an eco-friendly wood. The trees are harvested from sustainably managed forests, and the wood is processed using environmentally friendly methods. As a result, Pacaya Mesquite is a good choice for people who are looking for a sustainable and eco-friendly wood product.

## Truly Handcrafted

Every inch of every plank is touched by a human. Hand-scraping and hand-planing are carefully done by skilled artisans to add character, depth, and detail. The next step of hand-staining and glazing brings out the natural beauty of the wood.
