# Centralize business communications with Dialpad + Google

Connect your Dialpad unified communications platform with Google to create a powerful business communications hub.

Drive productivity by easily making calls and sending messages with the Dialpad Chrome extension. Quickly access Google workspace such as Drive files, Gmail, and Calendar events while using the Dialpad app.

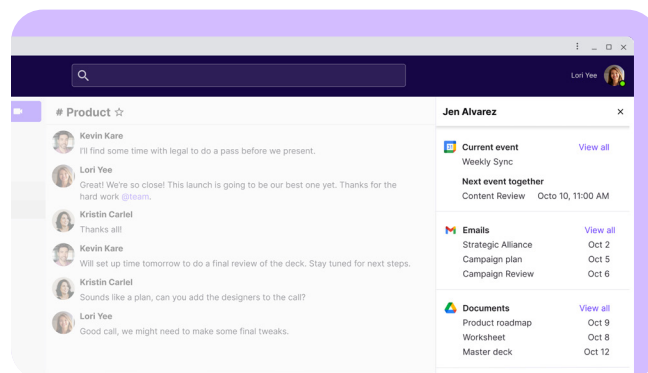

## Why Dialpad + Google?

Chrome
Call, Message, and Meet

• Call or text anyone using your Dialpad number directly from your Chrome Browser.
• Manage your contact center availability status if you're an agent.
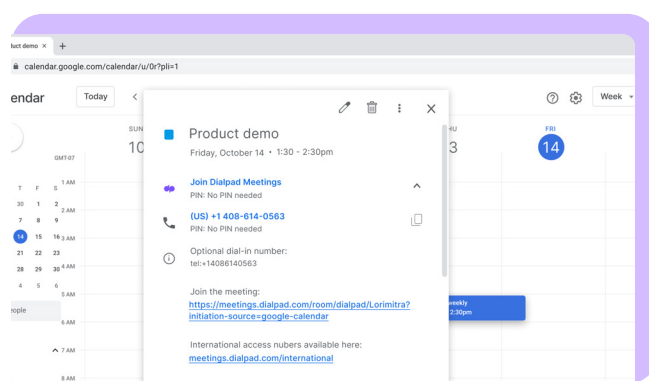

Workspace
Access Google without leaving Dialpad

• Within the Dialpad app get quick insights of shared documents, events, and Gmails.
• Effortlessly combine Dialpad Talk, Message, and Meetings to streamline business communications and view your workspace activity in one place.

Seamless sign-In with Google SSO

- Workspace users can use their Gmail credentials to log in to Dialpad using Single Sign-On (SSO), making secure access easy for your team.

Work natively with Calendar and Gmail

- Automatically add Dialpad Meetings to your calendar events, including international dial-in
- Call and message your Dialpad contacts without leaving Gmail
- Easily join Dialpad Meetings and engage with Gmail — no downloads required using Add-ons
