

Women in World Christianity: Challenges and Opportunities

Women are and always have been central to the Christian faith. Church history is full of nuns, martyrs, queens, and mystics, pastor's wives, mothers, missionaries, teachers, nurses, indigenous evangelists, and Bible women who helped Christianity survive, grow, and thrive. This workshop will cover the latest research on women in World Christianity, including gendered gaps in church membership, participation, and leadership, with reflection on how we can all work together to support gender equality in churches worldwide.

DR GINA ZURLO
