

# Vivi<sup>®</sup>

Surgical Helmet System

# REDEFINING COMFORT

As a healthcare professional, you want to protect your patient and yourself against contamination and infection, but protection comes with barriers that feel inconvenient at times. In the operating room, you have to stay sharp and focused - sometimes for hours.

The ViVi® Surgical Helmet System is the quietest<sup>1</sup> and most lightweight<sup>2,3</sup> surgical helmet available,\* illuminated by a powerful 100,000 Lux LED light. It keeps clinicians **cool** and **comfortable**, while providing **clear** visibility for precise surgical procedures.

\*versus market-share leaders

# COMFORTABLE

The quietest<sup>1</sup> and most lightweight<sup>2,3</sup> surgical helmet available,\*  
allowing surgeons to be **COMFORTABLE** during use.

### **Quiet**

Limits distraction and discomfort from noise with 57 dBa by utilizing the quietest air intake and exhaust system.<sup>1</sup>

### **Lightweight**

Balanced design featuring a carbon fiber (CFRP) frame weighing 0.84 lbs (non-lighted) and 0.95 lbs (lighted). You might not even notice that you're wearing it.

# COOL

Keeps clinicians **COOL** with a proprietary two-fan system that reduces the internal recirculation of CO<sub>2</sub> and directs it away from the patient.<sup>4</sup>

### Activity Sensing

Features activity sensing that automatically adjusts fan speed to clinician's level of activity.

### Fresh Air Nozzle

Allows air exchange rates over 40 times per minute to enable a cool internal suit temperature.

1

### Fresh Air Intake

The unique aerodynamic design is optimized for maximum airflow without re-circulation of exhaust air. The air duct is easy to clean.

2

### Exhaust Air Collection

Two ports collect humid and CO<sub>2</sub> enriched exhaust air and help to remove it from the suit.

3

### Air Exhaust

Exhaust air is directed out the back of the helmet, away from your patient.

# CLEAR

Provides **CLEAR** visibility with a 217° distraction-free visual field, illuminated by a powerful 100,000 Lux LED light.

### Wide Range of Light Motion

Positioned outside the “field of vision”, the light provides a wide range of motion that allows light adjustments from 0° to -55°.

### Bright LED Light

Powerful 100,000 Lux LED light.
