

AFFIXUS[®] Hip Fracture Nail

Product Brochure

AFFIXUS[®] Hip Fracture Nail

Goal Post[™] Technology

The Goal Post Technology is designed to facilitate visualization of the femoral neck on the lateral view in order to accurately place the guide pin for the lag screw. The anterior and posterior metal posts on the proximal aspect of the insertion jig allow for an unobstructed fluoroscopic view down to the base of the femoral neck and assist with fine tuning of the guide pin before it is fully seated in the femoral head.

*Visualize the goal...
before the plan is executed.*

Simple

- Procedurally oriented tray layout
- Streamlined and color-coded instruments

Benefit: Intuitive instrumentation and tray layout aids in procedural efficiency

Anatomic

- Optimal nail geometry
- Unique distal bend

Benefit: Aids in the placement of the implant within the femoral head and intramedullary canal

Versatile

- Extensive range of nail lengths and diameters
- Targeted utility hole and revision option

Benefit: Ability to customize the procedure

Short (180 mm)

Long (260-460 mm)

Multiple Locking Options

Lag Screw

Lag Screw with Anti-Rotation Screw
