What Exactly is INTERCEPTOR?

INTERCEPTOR is a cloud-based software and training system designed to "intercept" existing traffic flows from major platforms. Instead of fighting for crumbs on Google SEO or spending thousands on Facebook Ads, Interceptor focuses on leveraging untapped pockets of the internet where your ideal customers are already hanging out.

The core philosophy behind the system is **efficiency**. It aims to automate the process of finding high-intent audiences and redirecting them to your offers—whether you are an affiliate marketer, an e-commerce store owner, or a local business provider.

How Does It Work?

The system generally operates in three simple steps:

1. **Identify:** Use the software to find "low-hanging fruit" traffic sources in any niche.
2. **Intercept:** Deploy the "hidden hack" to capture the attention of these users.

3. **Monetize:** Redirect that traffic to your affiliate links or lead-capture pages.

Key Features & Benefits

1. Beginner-Friendly Dashboard

You don't need to be a coding wizard or a data scientist. The interface is built for the "everyman," featuring a clean layout and intuitive navigation.

2. The "Hidden Hack" Automation

The standout feature is the automation engine. It replaces hours of manual research by scanning platforms for specific engagement triggers that signal a "ready-to-buy" user.

3. No Monthly Fees (During Launch)

One of the biggest draws is the pricing model. While most traffic tools charge a hefty monthly subscription, Interceptor is currently available for a one-time investment.

4. Step-by-Step Video Training

Software is only as good as the person using it. The package includes over-the-shoulder training that shows you exactly how the creators are using the "hack" to generate daily commissions.

INTERCEPTOR Funnel: OTOs, Pricing & Discounts

To get the most out of Interceptor, it's important to understand the "Front End" (FE) and the optional "One-Time Offers" (OTOs).

Pro Tip: Look for "Exit-Intent" popups on the sales page! Often, if you move your mouse to close the tab, a **\$2 to \$5 discount coupon** will appear for the Front End product.

Front End: INTERCEPTOR Core (\$17 - \$27)

The base version of the software and the core training. This gives you everything you need to start intercepting traffic.

OTO 1: Unlimited Edition (\$37 - \$47)

The standard version often has caps on how many "interceptions" or campaigns you can run. This upgrade removes all restrictions, allowing for scaling to the moon.

OTO 2: Done-For-You (DFY) Campaigns (\$97 - \$197)

For those who want to skip the setup. This includes pre-vetted niches, high-converting squeeze pages, and proven offers ready to be plugged into the system.

OTO 3: Automation Add-on (\$47)

This takes the "hack" to the next level by automating the scheduling and posting process, making the traffic truly "set and forget."

OTO 4: Reseller Rights (\$67 - \$147)

Allows you to sell INTERCEPTOR as your own product and keep 100% of the profits across the entire funnel.
