What is ClickWave?

ClickWave is a cloud-based software designed to optimize the "click-to-customer" journey. Unlike traditional tools that focus solely on building pages, ClickWave emphasizes behavioral triggers and high-speed delivery. It is engineered for those who need to generate leads, sell products, or promote affiliate offers with minimal technical friction.

The core philosophy behind the software is **simplification**. It removes the need for expensive monthly subscriptions to multiple page builders by consolidating lead generation, automated engagement, and conversion tracking into a single dashboard.

Key Features and Functionality

1. Drag-and-Drop Conversion Engine

The platform features an intuitive interface that allows users to create high-converting landing pages, sales funnels, and opt-in forms in minutes. You don't need to know a single line of code; the "wave" technology ensures that elements align perfectly for both desktop and mobile viewers.

2. Smart Behavior Triggers

One of ClickWave's standout features is its ability to track user behavior in real-time. It can trigger specific overlays or discounts exactly when a user is about to exit the page, significantly reducing bounce rates and reclaiming lost sales.

3. Built-in Analytics Suite

Data is the lifeblood of digital marketing. ClickWave provides a clean, easy-to-read breakdown of your clicks, conversions, and ROI. This allows you to identify which "waves" of traffic are performing best so you can scale your winning campaigns instantly.

ClickWave OTOs and Pricing Structure

To get the most out of ClickWave, it is essential to understand the upgrade path. While the Front-End (FE) version is powerful, the OTOs unlock the automation and scaling capabilities required for professional-level results.

Front-End: ClickWave Commercial (\$17 - \$27)

The base version includes all core features, allowing you to create a set number of campaigns and use the primary templates. It's perfect for beginners or small business owners.

OTO 1: ClickWave Unlimited (\$37 - \$47)

This upgrade removes all "shackles." You can create unlimited campaigns, host unlimited pages, and drive unlimited traffic. For anyone looking to run a serious agency or multiple niche sites, this is a mandatory addition.

OTO 2: ClickWave Automation (\$27 - \$37)

This OTO allows you to put your marketing on autopilot. It includes scheduling features and advanced AI-driven triggers that respond to user actions without manual intervention.

OTO 3: ClickWave DFY (Done-For-You) (\$97 - \$197)

For those who want to skip the setup phase, this package provides pre-designed funnels and high-converting templates tailored to specific niches (Real Estate, E-commerce, Health, etc.).

OTO 4: ClickWave Agency License (\$67 - \$97)

This allows you to sell ClickWave services to clients. You can create sub-accounts and manage their marketing campaigns, effectively turning the software into a recurring revenue stream.
