

## LIGHTBARS

### Defender Series LED Lightbar

Featuring state-of-the-art TriCore LED technology created by our sister company Code3, the Defender is 2 ½ times brighter than any other light bar available in the world today. Intelligently designed to provide great visibility from every angle, the Defender is built to last, with advanced thermal management and a weather seal that effectively protects the light bar from weather damage and the wear and tear of constant use.

With brightness settings for both day and night time use, the Defender is an adaptable, premium light bar that will provide you with unequalled hazard warning, impact and protection.
