

SIRENS

R10

9005 Series Shockwave Remote Mount Siren Amplifier

With a host of different tones and extensive audio features, the high-quality, versatile ShockWave is perfect for law enforcement and emergency service applications. The generous features include both 100W and 200W speaker output, advanced PA with ancillary microphone unit, radio rebroadcast, play and record facilities, two relay outputs and a data output.

With both 12V and 24V options available, ShockWave meets all relevant EMC, NP1A and German KBA approvals, and can be easily operated via a wide range of controller options including MTC, STC and DIN slot units.
